

**TITLE III
PROCUREMENT**

Funds appropriated under this title provide the resources required to purchase military equipment and hardware, including aircraft, helicopters, ships, missiles, combat vehicles, ammunition, weapons, electronic sensors and communications equipment, and other procurement items.

The President's fiscal year 2007 budget requests a total of \$82,919,502,000 for procurement appropriations.

SUMMARY OF COMMITTEE ACTION

The Committee recommends procurement appropriations totaling \$80,958,052,000 for fiscal year 2007. This is \$1,961,450,000 below the budget estimate.

Committee recommended procurement appropriations for fiscal year 2007 are summarized below:

COMMITTEE RECOMMENDATIONS

The Committee has displayed recommended adjustments in tables presented under each appropriation account.

These adjustments reflect the following Committee actions: elimination of funds requested for programs which are lower priority, duplicative, or not supported by firm requirements in out year development or procurement appropriations; deletion of excess funds

based on program delays or slow execution; addition of funds to reflect congressional priorities and to rectify shortfalls in the budget estimate; and implementation of recommendations in S. 2766, the National Defense Authorization Act for Fiscal Year 2007.

The Committee directs that the funding increases outlined in these tables shall be provided only for the specific purposes indicated in the table.

PROCUREMENT OVERVIEW

National Guard Procurement.—The Committee is concerned that procurement funding and actual equipment designated for the National Guard could be diverted to other budget areas and non-National Guard units. The Committee notes that substantial shortfalls still exist in National Guard equipment stocks, threatening the force's dual-role mission to supplement active duty forces abroad and respond to emergencies at home. Therefore, the Department of Defense shall report to the Committee no later than 9 months after the passage of this act on how it has obligated funds and provided equipment designated for the National Guard in the budget and accompanying justification materials.

F-35 Joint Strike Fighter.—The fiscal year 2007 budget estimate requests funds to procure the first lot of Low Rate Initial Production [LRIP] aircraft and to fund advance procurement for the second lot of LRIP aircraft. The first lot consists of five Conventional Take Off and Landing [CTOL] aircraft for the Air Force; the fiscal year 2007 budget request is \$869,700,000. The second lot will consist of eight CTOL aircraft for the Air Force and eight Short Take Off and Vertical Landing [STOVL] aircraft for the Marine Corps. The Advance Procurement for lot two is \$145,300,000 for eight Air Force aircraft and \$245,000,000 for eight Marine Corps aircraft.

The Committee strongly supports the F-35 aircraft program and believes that it is a critical acquisition program for the Department of Defense and many partner nations. However, the acquisition strategy is unnecessarily concurrent. Procuring aircraft before the air frame structure and design have been validated through flight testing and before key ground tests have been completed presents high risks in terms of cost increases and schedule delays. "Buying before flying" is a known problem that can be avoided. It should be noted that the test aircraft are behind schedule already and some important tests, such as first flight, have been delayed to fiscal year 2007.

The Committee is also concerned about the use of cost-plus contracts to procure aircraft. Under the cost-plus type of contract, the Government holds all the cost and schedule risk; it is a measure of uncertainty. By the time the Department enters into a production contract, particularly for a sophisticated fighter aircraft, the design and engineering should be sufficiently stable so that the costs are understood. At that point, firm fixed-price contracts can be negotiated with acceptable risk to both the Government and industry. Under the current acquisition strategy, the use of fixed-price contracts will not be assured until full rate production begins in fiscal year 2013, at which point almost 300 aircraft could have been procured at "cost-plus" prices. The Committee urges the Air

Force to move to fixed-price contracting for F-35 procurement earlier in the procurement phase.

To reduce risk, costs, and future schedule instability, the Committee recommends a 1-year delay in production of F-35 JSF aircraft. The budget is adjusted so that Lot 1 procurement and Lot 2 advance procurement funds are deleted from fiscal year 2007.

Conventional Trident Missile.—The budget request includes \$127,000,000 to demonstrate the feasibility of using existing TRIDENT II (D-5) missiles with conventional payloads to provide a prompt global strike capability, including \$50,000,000 for initial procurement. The Committee believes that fundamental issues about the use of this weapon must be addressed prior to investing in this effort. Furthermore, it is not clear that other potentially less provocative alternatives, such as land and air-based options, have been considered. Therefore, the Committee directs the Secretary of Defense to request the National Academy of Sciences to analyze the mission requirement and, where appropriate, recommend alternatives that meet the prompt global strike mission in the near term (1–2 years), the mid-term (3–5 years), and the long-term. The study should include analyses of the military, political and international issues associated with each alternative. The study is due to the congressional defense committees by March 15, 2007. The Committee recommends no funding for the conventional TRIDENT missile program, but has provided \$5,000,000 in the “Research, Development, Test and Evaluation, Defense-Wide” appropriation to conduct the study.

Joint Cargo Aircraft [JCA].—The Army requested \$109,154,000 for the Future Cargo Aircraft, now known as JCA. Consistent with S. 2677, the National Defense Authorization Act for Fiscal Year 2007, the Committee recommendation does not fund this request. The Committee believes it is premature to procure these aircraft until a further analysis of the joint intra-theater airlift mission requirement is completed and the Army and Air Force jointly develop a concept of operations that details how these aircraft will be employed.

Armed Reconnaissance Helicopter [ARH].—The budget request includes \$141,418,000 for the initial procurement lot of ARH aircraft. The Committee is aware the program is currently behind schedule due to a slower than required staff buildup, the late release of drawings and lack of parts to support the aircraft build plan. In an effort to mitigate schedule risk by allowing for a more moderate production ramp, the Committee recommends \$101,818,000 for 12 aircraft, which is \$39,600,000 and 6 aircraft below the request.

Light Utility Helicopter [LUH].—The Committee recommendation includes \$91,177,000 for procurement of 16 LUH aircraft, the first full rate production lot. The recommendation is \$107,500,000 and 23 aircraft below the request. Over the past 2 fiscal years, Congress has appropriated \$94,600,000 for two LUH initial procurement lots totaling 16 airframes. However, the initial production contract, planned for award in January 2005 was not awarded

until June 30, 2006. Due to the delay in program start and concerns over the ability to reasonably execute three production lots in less than 15 months, the Committee recommendation is intended to allow additional time for the program to increase production in a more measured approach and for the Army to demonstrate the reliability of the selected platform.

Army Helicopter Engine Efficiencies.—The Committee is aware the engine utilized in the ARH program could also be utilized to power the LUH. The Committee is strongly supportive of the Department's efforts to increase cost efficiencies in the supply chain and to reduce total life cycle costs through the selection of interchangeable systems, subsystems, and components. Additionally, the Secretary of Defense has commissioned an Energy Efficiency Task Force focused on increasing efficiencies among weapon systems. The Committee believes this effort makes operational and financial sense and is advised the ARH engine can help achieve desired results. Accordingly, the Committee encourages the Department to consider utilizing this engine in the LUH program.

Installation Information Infrastructure Modernization Program.—The budget request includes \$279,579,000 to modernize and upgrade the telecommunications and information infrastructure on Army installations worldwide. The Committee supports the Army's need to upgrade networks and information technology but is concerned about the slow execution of this program. A significant amount of prior year funding remains unobligated, evidence that the Army is budgeting funds ahead of its actual need. Therefore, the Committee recommends \$247,579,000, a reduction of \$32,000,000 for this program.

Warrior Unmanned Aerial Vehicles [UAV] Program.—The budget request includes \$46,030,000 to procure and install weapons on unmanned aerial vehicles. The funding is included in two separate budget lines, “Tactical Unmanned Aerial System” and “Weaponization of Unmanned Aerial Systems.” Since the budget was submitted, the Army has increased the scope of the Warrior UAV program, including performance enhancements to reduce attrition and increase safety. At the request of the Army, a total of \$35,000,000 is transferred from the two procurement lines referenced above to the “Research, Development, Test and Evaluation, Army” appropriation to complete development of Warrior.

Radio Frequency Identification Technology [RFID].—The Committee has included an additional \$6,000,000 to continue the Active Data Rich RFID Technology Insertion and Enhancement Initiative. The Committee encourages the Department of Defense to capitalize on the successful, world-wide RFID implementation program by

fully tracking and securing supplies and materiel returning from Southwest Asia with electronic cargo container tags and environmental sensors that are fully compatible with DOD's extensive RF-ITV infrastructure.

General Fund Enterprise Business System.—The budget request includes \$78,403,000 to begin procurement and training on the new automated financial information system. The Army restructured the program after the budget was formulated and no longer requires this level of investment during fiscal year 2007. To align funding with the Army's current program, the budget is reduced by \$76,403,000, providing \$2,000,000 for initial hardware and licenses.

EA-18G and F/A-18 E/F Procurement.—The budget request includes \$865,421,000 for the first low rate initial procurement lot of EA-18G aircraft, which are expected to replace the EA-6B aircraft. The Committee notes the EA-18G development schedule was based on the premise that the EA-6B inventory would not be sufficient beyond 2009. Due to wing upgrades and the Improved Capabilities III program, the EA-6B is now expected to meet Navy needs beyond this timeframe. The Committee is concerned that under cur-

rent plans, the Navy will purchase all EA-18G LRIP aircraft prior to completion of operational test and evaluation. The Committee believes this is an unnecessary risk due to the extended service life of EA-6B aircraft. To mitigate this risk while not allowing for a pause in production, the Committee recommends a transfer of 4 of the 12 requested EA-18G's to F/A-18E/F production.

H-1 Upgrades.—The Department of Defense is in the process of restructuring the H-1 upgrade program, which replaces the current H-1 fleet with 90 newly built UH-1Y's, 10 remanufactured UH-1Y's and 180 remanufactured AH-1Z's. The current restructuring effort, the fourth since program inception, was initiated due to delays in completion of engineering and manufacturing development, unanticipated technical issues, delays in delivery of Low Rate Initial Production [LRIP] aircraft of 5 to 7 months and an increase of \$640,000,000 in total program costs. The proposed restructure would delay Milestone C and the full rate production decision to fiscal year 2008 and converting the planned fiscal year 2007 full rate production lot to a fourth LRIP lot.

Due to the pending restructure, manufacturing delays and technical problems, the Committee recommends \$314,718,000 for H-1 upgrade procurement, which is \$132,000,000 below the request. The recommended level provides the program with a total of 28 aircraft, including those previously appropriated. This amount represents 10 percent of the total production quantity, which is the traditional low rate initial production quantity established by section 2400 of title 10, United States Code. The Committee recommendation also includes \$77,320,000 to support non-recurring efforts planned for verification of corrections and to resolve known technical issues with the Helmet Mounted Sight and Display design and the structural repair manual.

T-45TS Goshawk.—Consistent with S. 2677, the National Defense Authorization Act for Fiscal Year 2007, the Committee recommendation includes \$312,361,000 for procurement of 10 T-45TS Goshawk training aircraft, which is a reduction of \$64,000,000 and two aircraft from the request. The Committee encourages the Navy to continue procurement of its training aircraft inventory objective in fiscal year 2008.

E-6 Series.—The budget request includes \$99,184,000 for modifications to E-6 series aircraft, which is \$87,965,000 above last year's funding level. The increased funding request is primarily due to a new effort to increase the number and bandwidth of communications links supporting command and control operations on-board the E-6B aircraft. The fiscal year 2007 request to initiate this work is \$69,700,000. The Committee is supportive of this effort and the capabilities it will provide. However, the Committee has concerns with the phasing of program execution. The program projects a 12-month non-recurring effort to develop the necessary installation kits for this initiative. As a result, the Committee believes the fiscal year 2007 funding execution strategy is unreasonable. The Committee, therefore, recommends a reduction of \$40,300,000 from the request.

Common Defensive Weapon System.—The budget request includes \$13,656,000 for the Common Defensive Weapon System. Over the past 2 fiscal years, Congress has provided over

\$21,000,000 for the procurement of this system. However, none of these funds have been put on contract due to aircraft integration development delays and a lack of adequate cost information. The Committee, therefore, recommends denying the fiscal year 2007 request.

Spares and Repair Parts.—The Committee recommends \$740,839,000 for Navy and Marine Corps aircraft spares and repair parts, which is \$71,850,000 below the budget request. The Committee recommends a reduction to H-1 spares due to a pending program restructure, delays in manufacturing, and decrease in near-term procurement quantities. The Committee further recommends reductions to spares and repair parts requests for KC-130J and T-45 aircraft. These reductions reflect the Committee’s recommended reductions to the number of production aircraft. Finally, the Committee recommendation includes a reduction to spares and repair parts that reflects the transfer of four EA-18G aircraft to F/A-18 E/F production.

SSN Engineered Refueling Overhaul Program.—The budget request includes \$22,078,000 in advance procurement funding for the SSN Engineered Refueling Overhaul program. In the past, the Committee has expressed concern about program instability and advance procurement funding requests for submarine refuelings that never appear in future budgets due to fiscal constraints. The Committee remains concerned about program instability and understands fiscal year 2008 refueling plans may change due to competing demands. The Committee, therefore, recommends denying the fiscal year 2007 advance procurement funding request.

DDG-1000.—The Senate-passed National Defense Authorization Act, 2007 (S. 2766) provides the Secretary of the Navy authority to enter into a contract for the first two DDG-1000 Zumwalt class destroyers with funding split over fiscal years 2007 and 2008. This special legislative authority is provided to support the Navy's current acquisition strategy of allocating dual lead ships to both of the two shipyards which build surface combatants. Consistent with the Senate-passed authorization bill and the Navy's current acquisition strategy, the Committee recommendation supports the budget request of \$2,568,111,000 for dual lead ships. The Committee reminds the Navy that this is a unique acquisition strategy and should not be used as a precedent for incrementally funding any future DDG-1000 or any other shipbuilding program.

Littoral Combat Ship [LCS].—The LCS is a small surface combatant optimized for littoral warfare and designed as an affordable platform to counter threats in mine, anti-submarine and surface warfare. The Navy's acquisition strategy was to procure four flight 0 ships evenly split between two competing designs and then progress to a single flight 1 design selected while evaluating system performance of the flight 0 ships. In 2005, the Navy proposed expanding the planned purchase of flight 0 ships from four to 15 and to continue production of both designs.

The Defense Appropriations Act, 2006 (Public Law 109-148) appropriated an additional \$440,000,000 in the "Shipbuilding and Conversion, Navy" account to accelerate procurement of the third and fourth LCS flight 0 ships. The additional funding was based

upon the Navy’s estimated \$220,000,000 unit cost. With the fiscal year 2007 budget submission of \$520,670,000 for the fifth and sixth LCS flight 0 ships, the Navy revealed the LCS unit cost estimate used as a basis for last year’s appropriation was exclusive of contract change orders, planning and engineering services, program management support and other costs not included in the ship construction contract. The Congressional Research Service estimates these adjustments would increase the average unit cost of LCS ships about 33 percent, to approximately \$300,000,000. As a result, the Navy is unable to procure both the third and fourth LCS flight 0 ships without the availability of additional funding. The Committee is troubled by this revelation and recommends rescinding the insufficient fiscal year 2006 funds currently allocated to the fourth LCS flight 0 vessel.

The Committee is further troubled by reports that the first two LCS flight 0 ships under construction are exceeding their cost as previously budgeted. In last year’s report, the Committee reminded the Navy that “the appeal of the LCS is its relative simplicity of design and low cost.” The Committee believes cost growth and design changes are jeopardizing the affordability appeal of LCS. As a result, the Committee believes the fiscal year 2007 budget request is insufficient to procure two ships and recommends \$300,670,000 to fully fund procurement of one LCS seaframe, which is a reduction of \$220,000,000 and one seaframe from the request. The Committee notes that this recommendation puts the Navy on its previously established path of procuring four LCS flight 0 ships by the end of fiscal year 2007.

Ship Insulation.—The Committee understands that the insulation material currently under consideration for use in future ships has not been fully evaluated for safety. The Committee believes that any new materials should be at least as safe as those materials currently in use and recommends that insulating materials that do not meet the weight, smoke generation, toxicity and other safety criteria should not be used in ship construction.

F-22A.—The fiscal year 2007 budget requests \$1,981,302,000 to begin incrementally funding the next lot of F-22A aircraft. The Committee finds no compelling reason to ignore the full funding policy and incrementally fund this program. Therefore, \$1,400,000,000 was added to the budget estimate to fully fund the proposed multiyear procurement of aircraft consistent with the guidance in S. 2766, the National Defense Authorization Act for Fiscal Year 2007.

F-117.—The budget request includes \$24,422,000 for modifications to the F-117 aircraft. While the Committee understands the Department's desire to modernize its fleet of aircraft and supports the request to retire 10 F-117s in fiscal year 2007, the Committee is concerned about sustaining adequate fighter capability. The Committee suggests that the Department consider whether the proposal to retire 42 F-117s in fiscal year 2008 is the most appropriate course of action.

Given the prospective retirement of the fleet, the Committee reduces the request by \$22,400,000, eliminating modifications for the aircraft except for safety and service bulletin requirements. The Committee is open to revisiting this issue with the fiscal year 2008 budget request.

F-15.—The budget request includes \$92,901,000 for modifications to the F-15 aircraft. In consideration of the key role that this fighter will continue to play in national defense in the future, the Committee added \$87,000,000 to procure Active Electronically Scanned Array radars for the Air National Guard F-15C fleet. The Committee encourages the Air Force to develop a plan for keeping the F-15 inventory updated with current technologies for its expected active service life.

C-17.—The C-17 airlift aircraft has proved invaluable in meeting the worldwide transport and cargo requirements of our armed forces. The Committee is concerned that shutting down the production line after the fiscal year 2007 buy, leaving an inventory of only 183 aircraft, is premature and ill-advised. The costs to reopen the line later could be prohibitively expensive. The Committee directs the Department of Defense to continue funding C-17 production in the fiscal year 2008 budget.

MC-130 H Combat Talon.—The MC-130 H Combat Talon “Plus 10” program contract has been terminated and the program is in the process of being restructured. Therefore, the Committee recommends a decrease of \$158,824,000. The appropriated fiscal year 2006 funding remains available to support the program once a new acquisition strategy has been approved and USSOCOM is prepared to enter a new contract.

Multi-Band Inter/Intra Team Radio [MBITR].—The Committee understands that the Special Operations Command [SOCOM] has adjusted its acquisition strategy for the MBITR tactical radio program to defer procurement in fiscal year 2007 to allow additional development and software upgrades. These upgrades should be completed in fiscal year 2007, and the Committee looks forward to the command’s fiscal year 2008 budget request to procure the enhanced MBITR.

NATIONAL GUARD AND RESERVE EQUIPMENT

Appropriations, 2006	\$178,206,000
Budget estimate, 2007
House allowance	500,000,000
Committee recommendation	340,000,000

The Committee recommends an appropriation of \$340,000,000. This is \$340,000,000 above the budget estimate.

The appropriation includes direction for each Reserve and National Guard component commander to submit to the congressional defense committees a detailed assessment of that component's modernization priorities.

The Committee maintains that the Reserve and National Guard component commanders should exercise control of funds provided for their modernization in this account. The separate submission of these assessments, directly from the Reserve component commanders and the National Guard Directors to the committees will ensure that Reserve and National Guard priorities are addressed in the allocation of this appropriation.

COMMITTEE RECOMMENDED PROGRAM

The following table summarizes the budget estimate for this appropriation, the Committee recommendation, and the Committee recommended adjustments to the budget estimate:
