

basis of dollar amount authorized pursuant to subsection (a) shall be based on authorized, transparent, statutory criteria, or merit-based selection procedures in accordance with the requirements of sections 2304(k) and 2374 of title 10, United States Code, and other applicable provisions of law.

(c) *RELATIONSHIP TO TRANSFER AND REPROGRAMMING AUTHORITY.*—This section does not prevent an amount covered by this section from being transferred or reprogrammed under a transfer or reprogramming authority provided by another provision of this Act or by other law. The transfer or reprogramming of an amount specified in a funding table referred to in subsection (a) shall not count against a ceiling on such transfers or reprogrammings under section 1001 of this Act or any other provision of law, unless such transfer or reprogramming would move funds between appropriation accounts.

(d) *APPLICABILITY TO CLASSIFIED ANNEX.*—This section applies to any classified annex that accompanies this Act.

(e) *ORAL AND WRITTEN COMMUNICATION.*—No oral or written communication concerning any amount specified in a funding table referred to in subsection (a) shall supersede the requirements of this section.

## TITLE XLI—PROCUREMENT

### SEC. 4101. PROCUREMENT.

<b>PROCUREMENT</b> (In Thousands of Dollars)			
<i>Line</i>	<i>Item</i>	<i>FY 2010 Request</i>	<i>Conference Agreement</i>
<b>AIRCRAFT PROCUREMENT, ARMY</b>			
<b>AIRCRAFT</b>			
<b>FIXED WING</b>			
001	JOINT CARGO AIRCRAFT (JCA) .....		
002	UTILITY F/W AIRCRAFT .....		
003	MQ-1 UAV .....	401,364	201,364
	Avoid forward funding of production .....		[-200,000]
004	RQ-11 (RAVEN) .....	35,008	35,008
004A	C-12A .....		
<b>ROTARY WING</b>			
006	ARMED RECONNAISSANCE HELICOPTER .....		
007	ADVANCE PROCUREMENT (CY) .....		
008	HELICOPTER, LIGHT UTILITY (LUH) .....	326,040	326,040
009	AH-64 APACHE BLOCK III .....	161,280	161,280
010	ADVANCE PROCUREMENT (CY) .....	57,890	57,890
011	UH-60 BLACKHAWK (MYP) .....	1,258,374	1,258,374
012	ADVANCE PROCUREMENT (CY) .....	98,740	98,740
013	CH-47 HELICOPTER .....	860,087	882,087
	Transfer From APA 22 .....		[22,000]
014	ADVANCE PROCUREMENT (CY) .....	50,676	50,676
015	HELICOPTER NEW TRAINING .....	19,639	0
	Program Not Justified .....		[-19,639]
<b>MODIFICATION OF AIRCRAFT</b>			
016	MQ-1 PAYLOAD—UAS .....	87,424	87,424
017	MQ-1 WEAPONIZATION—UAS .....	14,832	14,832
018	GUARDRAIL MODS (MIP) .....	61,517	61,517
019	MULTI SENSOR ABN RECON (MIP) .....	21,457	21,457
020	AH-64 MODS .....	426,415	427,415
	Air Filtration Systems .....		[1,000]
021	ADVANCE PROCUREMENT (CY) .....		
022	CH-47 CARGO HELICOPTER MODS (MYP) .....	102,876	85,876
	Common Avionics Architecture System .....		[2,000]

**PROCUREMENT**  
(In Thousands of Dollars)

Line	Item	FY 2010 Request	Conference Agreement
	Vibration Management Enhancement Program .....		[3,000]
	Transfer to APA 13 .....		[-22,000]
023	ADVANCE PROCUREMENT (CY) .....		
024	UTILITY / CARGO AIRPLANE MODS .....	39,547	39,547
025	AIRCRAFT LONG RANGE MODS .....	823	823
026	UTILITY HELICOPTER MODS .....	66,682	71,682
	UH-60 ARNG Rewiring Program .....		[5,000]
027	KIOWA WARRIOR .....	140,768	140,768
028	AIRBORNE AVIONICS .....	241,287	241,287
029	GATM ROLLUP .....	103,142	103,142
030	RQ-7 UAV MODS .....	283,012	283,012
030A	C-12A .....		
	<b>SPARES AND REPAIR PARTS</b>		
031	SPARE PARTS (AIR) .....	7,083	7,083
	<b>SUPPORT EQUIPMENT AND FACILITIES</b>		
	<b>GROUND SUPPORT AVIONICS</b>		
032	AIRCRAFT SURVIVABILITY EQUIPMENT .....	25,975	25,975
033	ASE INFRARED CM .....	186,356	186,356
	<b>OTHER SUPPORT</b>		
034	AVIONICS SUPPORT EQUIPMENT .....	4,933	4,933
035	COMMON GROUND EQUIPMENT .....	87,682	87,682
036	AIRCREW INTEGRATED SYSTEMS .....	52,725	55,725
	Air warrior ensemble—generation III .....		[3,000]
037	AIR TRAFFIC CONTROL .....	76,999	76,999
038	INDUSTRIAL FACILITIES .....	1,533	1,533
039	LAUNCHER, 2.75 ROCKET .....	2,716	2,716
040	AIRBORNE COMMUNICATIONS .....	11,109	11,109

## DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATIONS

### TITLE I—PROCUREMENT

#### BUDGET ITEMS

##### *Paladin Integration Management*

The budget request included \$96.5 million in Weapons and Tracked Combat Vehicles, Army, for M109A6 Paladin Integration Management (PIM).

The House bill and the Senate amendment would authorize the budget request.

The conferees agree to a \$91.5 million decrease for PIM procurement as requested by the Army.

##### *Standard Missile-3 procurement*

The budget request included \$168.7 million in Procurement, Defense-wide, for procurement of Standard Missile-3 (SM-3) Block IA interceptors for the Aegis Ballistic Missile Defense (BMD) system.

The House bill would authorize the budget request.

The Senate amendment would authorize the budget request.

The conference agreement would authorize \$191.9 million in Procurement, Defense-wide, for procurement of SM-3 Block IA missiles, an increase of \$23.2 million.

The conferees note that on September 17, 2009, the President announced a new missile defense architecture for Europe that will rely heavily on the SM-3 interceptor, to be used both on ships and on land. The first phase of the architecture, to be deployed in 2011, would include deployment of Aegis BMD ships equipped with SM-3 Block IA interceptors to defend against existing Iranian short- and medium-range ballistic missiles. The conferees believe it would be valuable to increase the inventory of SM-3 Block IA interceptors to defend against Iran's existing ballistic missile capabilities.

##### *National Guard and Reserve Equipment—Overview*

The budget request for fiscal year 2010 included an authorization request for National Guard and Reserve Equipment procurement within various accounts in the Department of Defense.

The House bill would authorize \$600.0 million specifically for National Guard and Reserve Equipment.

The Senate amendment would provide no authorization for National Guard and Reserve Equipment.

The conferees recommend an authorization of \$600.0 million for National Guard and Reserve Equipment. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

The conferees expect that the National Guard and Reserve forces to use this funding to procure high priority equipment that would be used by these units in their critical dual mission role of full-spectrum combat operations and domestic civil support missions.

#### ITEMS OF SPECIAL INTEREST

##### *VH-71 Presidential helicopter program*

In April 2009, the administration proposed in budget documents, including a document called "Terminations, Reductions, and Savings, Fiscal Year 2010," to terminate the Presidential helicopter replacement (VH-71) program and initiate a new Presidential helicopter replacement program.

The Secretary of Defense announced on April 6, 2009, the cancellation of the VH-71 program, after that program experienced a history of excessive and uncontrolled cost growth and persistent slips in its delivery schedule. On May 15, 2009, the Under Secretary of Defense for Acquisitions, Technology, and Logistics issued an acquisition decision memorandum implementing the Secretary's decision and the Department of the Navy issued a stop-work order on the program. Subsequently, on June 1, 2009, the Secretary of the Navy canceled the System Development and Design contract for the program.

While the conferees agree that cancellation of the program was warranted under the circumstances, they are disappointed that:

(1) the Nation has invested more than \$3.0 billion in this program and has little to show for that investment;

(2) the Navy invested considerable time and talent in trying to implement the acquisition program without success; and

(3) the "requirements" system failed to do its fair share of trading requirements or adding resources when the acquisition program ran into immovable obstacles.

During this process, the Navy and its acquisition system failed to receive adequate support, resources, and authority from the Office of the Secretary of Defense (OSD) and the White House Military Office (WHMO) to execute a successful acquisition program. The conferees understand that despite the many warnings and expert advice from the Government Accountability Office, Navy acquisition officials were directed by OSD and WHMO to execute a schedule-driven program and were unable to adhere to prudent acquisition practices.

The conferees note that a June 5, 2009, Congressional Research Service report cites Navy estimates that a new acquisition program would probably cost between \$10.0 billion and \$17.0 billion.

Therefore, given that level of possible investment, the conferees strongly encourage the Department of Defense and the Executive Branch to consider a complete range of alternatives for meeting requirements. The conferees believe that such consideration must include evaluating both single- and multi-platform solutions to meet the complete transportation requirements of the President, and evaluating costs, consider the investment already made in the VH-71 program for possible use for some portion of the mission within a multi-platform solution. The conferees also believe that a program to replace the Presidential helicopter presents a particularly valuable opportunity for the Department of Defense to demonstrate the right way to develop and procure major weapon systems. Accordingly, the conferees expect that, in implementing such a program, the Department will fully comply with the letter and the spirit of the recently enacted Weapon Systems Acquisition Reform Act of 2009 (Public Law 111-23).

#### Subtitle A—Authorization of Appropriations

##### LEGISLATIVE PROVISIONS ADOPTED

##### *Authorization of appropriations (secs. 101–106)*

The House bill contained provisions (secs. 101–106) that would authorize the recommended fiscal year 2010 funding levels for procurement for the Army, Navy, Marine Corps, Air Force, Defense-wide activities, and National Guard and reserve equipment, and Rapid Acquisition Fund.

The Senate amendment contained provisions (secs. 101–104) that would authorize the recommended fiscal year 2010 funding levels for procurement for the Army, Navy, Marine Corps, Air Force, and Defense-wide activities.

The conferees agree to include provisions that would authorize the recommended fiscal year 2010 funding levels for procurement for the Army, Navy, Marine Corps, Air Force, Defense-wide activities, National Guard and reserve equipment, and Mine Resistant Ambush Protected Vehicle Fund.

##### *Relation to funding table (sec. 107)*

The Senate amendment contained a provision that would specify that the amounts authorized to be appropriated by sections 101, 102, 103, and 104 of the amendment would be available, in accordance with the requirements of section 4001 of the amendment, for projects, programs, and activities, and in the amounts, specified in the funding table in section 4101 of the amendment.

The House bill contained no similar provision.

The House recedes with a technical amendment.

#### Subtitle B—Army Programs

##### *Procurement of future combat systems spin out early-infantry brigade combat team equipment (sec. 111)*

The House bill contained a provision (sec. 112) that would limit the Army to the procurement of one brigade set of Future Combat Systems spin out early-infantry brigade combat team equipment in order to allow for adequate testing prior to full-rate production.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize the Army to increase the quantity of equipment procured through low-rate initial production provided that the Under Secretary of Defense for Acquisition, Technology, and Logistics makes certain certifications with respect to the program's strategy and baseline, testing, technology readiness, and independent cost estimates.

#### Subtitle C—Navy Programs

##### *Littoral Combat Ship program (sec. 121)*

The House bill contained a provision (sec. 121) that would restructure the cost cap for the Littoral Combat Ship (LCS) program, subject to certain prerequisites and certifications. The bill would also authorize the Secretary to obligate funds to compile a technical data package necessary for future competition.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would provide authority to the Secretary of the Navy to implement a new acquisition strategy, as requested by the Secretary, that would utilize a block-buy approach for the procurement of LCS vessels during the period of fiscal year 2010 through 2014, and would include authority to obligate funds for economic order quantity buys and cost reduction initiatives, should such measures improve overall program affordability. The conferees note that, unlike a multiyear procurement, a block-buy is useful here in that it conveys a long-term commitment by the Government to execute the program in a way that allows the Government to extract economic advantages from its purchases. However, a block-buy does not bind the government to performance under a multiyear contract, thereby subjecting the government to liability for cancellation or termination costs in the event of non-performance under the contract.

In addition, the amendment would apply a revised cost cap to the fiscal 2011 ships, which could be waived under certain circumstances. The amendment would also require the Navy to obtain a technical data package from the winning LCS contractor.

The conferees support the revised acquisition strategy for the program, which is based upon many of the principles long advocated by the conferees, including enhancing competition, assuring more program stability, achieving more efficient construction rates, incentivizing industry investment, and increasing commonality.

The conferees recognize that the existing cost cap for the LCS program has been effective, prohibiting the Navy from awarding an unaffordable contract in fiscal year 2010. Consequently, the conferees agree to retain a cost cap, while giving the Secretary of the Navy significant discretion in the award of the fiscal year 2010 through 2014 ships. The conferees intend the cost cap described in subsection (c)(1) to apply to the fiscal year 2011 ships and any additional ship constructed through 2014 at the shipyard that is a member of the contractor team selected in response to the solicitation for the fiscal year 2010 ships.

The conferees expect that, if contractors and suppliers respond to this solicitation with aggressive pricing proposals that result in a more affordable program, the government will guarantee long-

term stability in the procurement plan. The conferees believe that, with aggressive construction yard investment and “design for affordability” changes, costs for vessels should continue to decline (in constant dollars) over the period of the block-buy.

The amendment would also require that the Navy report yearly on specific costs incurred in the construction of LCS vessels and adjustments to the cost caps. The conferees intend that this annual report would assist in providing strong oversight on the costs of this program. If the Navy and contractors are unable to achieve significant cost savings under this new acquisition strategy, the conferees’ support for this program will not be assured.

*Treatment of Littoral Combat Ship program as a major defense acquisition program (sec. 122)*

The Senate amendment contained a provision (sec. 111) that would require the Littoral Combat Ship program be designated as a major defense acquisition program.

The House bill contained no similar provision.

The House recesses.

The conferees note that the Weapon Systems Acquisition Reform Act of 2009 (Public Law 111–23), if interpreted properly, would require this program already to be so designated.

*Report on strategic plan for homeporting the Littoral Combat Ship (sec. 123)*

The Senate amendment contained a provision (sec. 112) that would require the Secretary of the Navy to submit a strategic plan for homeporting vessels in the Littoral Combat Ship program.

The House bill contained no similar provision.

The House recesses with technical amendments.

*Advance procurement funding (sec. 124)*

The House bill contained a provision (sec. 123) that would authorize the Secretary of the Navy to use advance procurement funds to enter into contracts for production planning and other related support services that reduce overall procurement lead time of the vessel. Additionally, this section would authorize the Secretary to enter into contracts for advance construction efforts for the aircraft carrier designated CVN–79, if the Secretary determines that cost savings, construction efficiencies, or workforce stability would be achieved through the use of such contracts.

The Senate amendment contained no similar provision.

The Senate recesses.

*Procurement programs for future naval surface combatants (sec. 125)*

The Senate amendment contained a provision (sec. 113) that would prevent the Navy from obligating any funds for building surface combatants after 2011 until the Navy conducts particular analyses, and completes certain tasks that should be required at the beginning of major defense acquisition programs. The committee report (S. Rept. 111–35) also would direct that the Secretary of the Navy obligate no more than 50 percent of the funds authorized for fiscal year 2010 in PE 24201N, CG(X), until the Navy sub-

mits a plan for implementing the requirements of this section to the congressional defense committees.

The House bill contained no similar provision.

The House recesses with technical amendments. The conferees agree to direct that the Secretary submit the plan for implementing the requirements of this section to the congressional defense committees at the same time as the President submits the budget request for fiscal year 2011.

*Ford-class aircraft carrier report (sec. 126)*

The House bill contained a provision (sec. 122) that would require the Secretary of the Navy to make an assessment of the cost of shifting to 5-year intervals for the construction of aircraft carriers, including the effect of such shifting of that interval on other programs. The House bill would have placed a limitation on the use of any funds for the aircraft carrier, designated CVN-79, for shifting to a 5-year interval.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would remove the limitation on the use of funds for CVN-79.

The conferees note that a 5-year interval for aircraft carrier construction, as proposed by the Secretary of Defense, may be the appropriate course of action for the Department of the Navy. However, the conferees are concerned that this decision may not have been made following a rigorous cost-benefit analysis. Therefore, the conferees expect that the Secretary of the Navy will take no further action to preclude the ability of the Secretary to award a construction contract for CVN-79 in fiscal year 2012 or the aircraft carrier designated CVN-80 in fiscal year 2016, consistent with the Annual Long-Range Plan for Construction of Naval Vessels for Fiscal Year 2009, until he completes the required assessment and fully informs the congressional defense committees of any such a decision.

*Report on service life extension program for Oliver Hazard Perry class frigates (sec. 127)*

The Senate amendment contained a provision (sec. 114) that would require the Secretary of the Navy to submit a report on a service life extension program for the Oliver Hazard Perry class frigates.

The House bill contained no similar provision.

The House recesses with a technical amendment.

*Conditional multiyear procurement authority for F/A-18E, F/A-18F, or EA-18G aircraft (sec. 128)*

The House bill contained a provision (sec. 124) that would authorize the Secretary of the Navy to buy F/A-18E/F or EA-18G aircraft under a multiyear contract.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would, notwithstanding only that element within section 2306b(i)(1) of title 10, United States Code, that requires the Secretary of Defense to provide required certifications (in this case) by March 1, 2009, and authorize the Secretary of the Navy to buy F/A-18E/F or EA-18G aircraft under a multiyear contract, but only if that multiyear con-

tract otherwise fully complies with the requirements of section 2306b of title 10, United States Code. In addition, the amendment would require by March 1, 2010, that the Secretary of the Defense submit to the congressional defense committees a report on how the findings and conclusions of the Quadrennial Defense Review and 30-year aviation procurement plan have informed the Department's acquisition strategy with regard to the F/A-18E/F and EA-18G aircraft programs-of-record.

The conferees note that the authority granted under this provision would expire on May 1, 2010, unless the Secretary of the Navy provides Congress written notification that the Department intends to execute the authority provided by this provision, but that administrative processes or other contracting activities necessary for execution of this authority cannot be completed by May 1, 2010. The provision would require that any such notification: (1) include a date certain for execution of the authority; and (2) specify a date no later than September 30, 2010, for such completion.

With this provision, the conferees convey general support for the Department's current plans to ensure that it meets the Navy's forward presence and operational requirements, while the F-35B and F-35C are being developed and ultimately fielded. However, this provision is also intended to reflect the conferees continuing concerns that, in light of the continuing increase in the strike-fighter shortfall, definitive actions that mitigate the stated shortfall cannot be delayed for too much longer. Should the Quadrennial Defense Review and the 30-year aviation procurement plan warrant a change in the programs-of-record for either the F/A-18E/F or EA-18G, the conferees expect that the Department of the Defense will give full and fair consideration to buying additional F/A-18E/F or EA-18G aircraft under a multiyear contract.

On August 17, 2009, the Under Secretary of Defense for Acquisition, Technology, and Logistics provided the congressional defense committees with a report, required by section 123 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110-417), detailing a cost and benefit comparison between an annual and multiyear F/A-18E/F and EA-18G aircraft procurement through fiscal year 2015. In that report, the Under Secretary, using the current pricing agreement data provided by the contractor, estimated that the savings that the Navy could expect to achieve, procuring the remaining program of record 89 F/A-18E/F and EA-18G aircraft, equated to 6.48 percent, or \$315.0 million. The conferees expect that, should the Navy exercise the authority granted under this provision, the contractors and suppliers would respond to any solicitation with aggressive pricing proposals that would allow the Navy to achieve greater savings.

In view of the lateness with which the Department submitted the fiscal year 2010 budget to Congress, the conferees agree to grant this narrow exception to the requirements of section 2306b, title 10, United States Code, as amended in the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181). However, the conferees fully expect the Department to address with due diligence and spirit of intent, items of interest addressed by conferees in section 811 of the statement of managers (H. Rept. 110-477) accompanying that Act. Finally, the conferees expect that all

subsequent multiyear procurement authority requests from the Department of Defense will be fully compliant with the requirements set forth in section 2306b, title 10, United States Code.

#### Subtitle D—Air Force Programs

##### *Report on the procurement of 4.5 generation fighter aircraft (sec. 131)*

The House bill contained a provision (sec. 133) that would report on various aspects of potential procurement of 4.5 generation fighter aircraft.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would delete references in the provision to multiyear procurement and certifications.

The conferees agree that the investment strategy that the Department of the Air Force intends to help the Department of Defense transition from, the capability provided by the current tactical fighter force to a smaller but more flexible, lethal and capable strike fighter force, will be challenging. As the Air Force implements that strategy but where circumstances warrant, the conferees expect the Air Force will analyze the viability of procuring additional 4.5 generation fighter aircraft under a multiyear contract and, where those conditions required to be present under Section 2306b of title 10, United States Code, as amended, exist, submit a multiyear procurement proposal to Congress, accompanied with certifications required under Section 2306b of title 10, United States Code, as amended.

With this provision, the conferees merely intend for the Air Force to conduct, and provide the congressional defense committees with, the analysis necessary to support, where warranted, a multiyear purchase of additional 4.5 generation fighter aircraft, specifically defined under this provision to capture the F-15, F-16, and F-18 that have advanced radar, data-link and avionics capabilities and the capability to deploy advanced armaments. The conferees do not intend that this provision will modify in any way the requirements of Section 2306b of title 10, United States Code, as amended, by section 811 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181), and the statement of managers accompanying those amendments (H. Rept. 110-477).

##### *Revised availability of certain funds available for the F-22A fighter aircraft (sec. 132)*

The House bill contained a provision (sec. 131) that would repeal section 134 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110-417).

The Senate amendment contained a similar provision (sec. 122) that would (1) repeal section 134; and (2) allow the Secretary of the Air Force to reallocate fiscal year 2009 F-22A advanced procurement funds to other F-22A priorities.

The House recedes.

*Preservation and storage of unique tooling for F-22 fighter aircraft (sec. 133)*

The House bill contained a provision (sec. 132) that would require the Secretary of the Air Force to develop a plan for the preservation and storage of unique tooling related to the production of hardware and end items for F-22 fighter aircraft which would: (1) ensure that the Secretary preserves and stores such tooling in a manner that allows the production of such hardware and end items to be restarted after a period of idleness; (2) identify the costs of restarting production with respect to the supplier base of such hardware and end items; and (3) identify any contract modifications, additional facilities, or funding that the Secretary determines necessary to carry out the plan. This section would also prevent the Secretary from spending any funds to dispose of F-22 production tooling until 45 days after the Secretary submits the required report.

The Senate amendment contained a similar provision.  
The Senate recedes with a technical amendment.

*AC-130 gunships (sec. 134)*

The Senate amendment contained a provision (sec. 125) that would require a report on the service life of AC-130 gunships and an analysis of alternatives for any gunship modernization requirements identified by the 2009 Quadrennial Defense Review.

The House bill contained no similar provision.  
The House recedes with a clarifying amendment.

*Report on E-8C Joint Surveillance and Target Attack Radar System re-engining (sec. 135)*

The Senate amendment contained a provision (sec. 126) that would require the Secretary of the Air Force to provide a report on various aspects of the Air Force's plan to provide new engines to the E-8C joint surveillance and target attack radar system (JSTARS) aircraft. The provision would also prevent the Air Force from taking any action that would disrupt execution of that re-engining program until the Secretary submits that report.

The House bill contained no similar provision.  
The House recedes.

*Repeal of requirement to maintain certain retired C-130E aircraft (sec. 136)*

The House bill contained a provision (sec. 136) that would amend section 134 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181) to repeal the requirement to maintain certain retired C-130E aircraft.

The Senate amendment contained no similar provision.  
The Senate recedes.

*Limitation on retirement of C-5 aircraft (sec. 137)*

The Senate amendment contained a provision (sec. 121) that would prevent the Air Force from retiring any C-5 aircraft until certain conditions are met. These include: (1) completing operational testing of the C-5 Reliability Enhancement and Re-engining Program; (2) providing a report by the Director of Oper-

ational Testing on the results of that operational testing; and (3) delivering reports on the economic and risk analyses that led to any decision to retire the aircraft before the end of their useful service lives.

The House bill contained no similar provision.

The House recedes with an amendment that would, among other things, reduce the required waiting period after notification by the Secretary and eliminate the requirement that any aircraft retired be maintained in Type 1000 storage.

*Reports on strategic airlift aircraft (sec. 138)*

The House bill contained a provision (sec. 134) that would require the Secretary of the Air Force, in consultation with the Director of the Air National Guard, to submit a report to the congressional defense committees on the proposed force structure and basing of strategic airlift aircraft at least 120 days before the date on which any C-5 aircraft is retired.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would: (1) change the reporting period to 90 days before any retirement; and (2) remove a reporting requirement related to military construction funding increases.

*Strategic airlift force structure (sec. 139)*

The House bill contained a provision (sec. 135) that would increase the minimum required strategic airlift force structure by amending subsection (g)(1) of section 8062 of title 10, United States Code, by striking “2008” and inserting “2009,” and by striking “299” and inserting “316.”

The Senate amendment contained no similar provision.

The Senate recedes.

Subtitle E—Joint and Multiservice Matters

*Body armor procurement (sec. 141)*

The House bill contained a provision (sec. 141) that would require the Secretary of Defense to establish within each military service procurement account a separate procurement budget line item assigned for body armor investment and funding transparency.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment. The conferees do not intend that this provision should limit the military departments’ ability to use other rapid development or acquisition authorities to ensure the fastest possible exploitation of body armor material improvements, production, or fielding to our deployed or deploying forces.

*Unmanned cargo-carrying-capable aerial vehicles (sec. 142)*

The House bill contained a provision (sec. 142) that would prohibit obligation or expenditure of procurement funding for an unmanned cargo-carrying-capable aerial vehicle until 15 days after the Department had certified that the Joint Requirements Over-

sight Council has approved a joint and common requirement for such a vehicle type.

The Senate amendment contained no similar provision.  
The Senate recesses.

*Modification of nature of data link for use by tactical unmanned aerial vehicles (sec. 143)*

The Senate amendment contained a provision (sec. 131) that would amend section 141(a)(1) of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–163) to add Internet Protocol-capable communications relays as an additional standard for Department of Defense unmanned aerial vehicles.

The House bill contained no similar provision.  
The House recesses, with a technical amendment.

LEGISLATIVE PROVISIONS NOT ADOPTED

*Elimination of F–22A aircraft procurement funding*

The Senate amendment contained a provision (sec. 106) that eliminated funding from the bill as reported by the Senate Committee on Armed Services that would have authorized additional F–22A procurement funding.

The House bill contained no similar provision and no authorization of funding for additional procurement of F–22A in fiscal year 2010.

The Senate recesses.

The conferees agree not to authorize funding for additional procurement of F–22A in fiscal year 2010.

*Restriction on obligation of funds for Army tactical radio systems*

The House bill contained a provision (sec. 111) that would restrict the obligation of funds for all Army tactical radio sets except for those approved by the joint tactical radio system (JTRS) joint program office and those specifically procured to meet an operational needs statement or joint urgent operational need statement.

The Senate amendment contained no similar provision.

The House recesses.

The conferees are concerned that the Army lacks clear requirements, or a comprehensive acquisition strategy, for the procurement and upgrade of its tactical radio systems. Given the billions of dollars requested each year by the Army for communications equipment, and the importance of this equipment in ongoing combat operations, the conferees are alarmed that the Army has been unable to put a disciplined acquisition process in place to procure the needed equipment in a manner that avoids waste, fosters true competition, moves the Army away from reliance on legacy radio systems, and anticipates and bridges to next generation radio communications.

The conferees believe that despite clear congressional intent and guidance, the Army continues to rely on legacy radio systems awarded through a marginally competitive process, has failed to update requirements, has not provided adequate internal oversight and discipline to its radio acquisition plans, and is potentially jeopardizing its ability to create and transition affordably to the future

battlefield network. For example, the Army has yet to adjust its requirements for the various models of the JTRS program 6 months after the Department of Defense's (DOD) termination of the Future Combat Systems program. In addition, the Army, in the fiscal year 2010 budget, requested \$135.0 million in funding for the Single Channel Ground and Airborne Radio system despite the fact that Congress had already provided funding adequate to procure the current acquisition objective. Finally, the Army has yet to develop a plan to integrate into its inventory or requirements more than 20,000 vehicular radio sets procured from commercial sources that the Army still claims do not meet full Army requirements despite their use in combat operations for more than 5 years.

The conferees understand that managing the requirements and acquisition system for such a large and diverse set of equipment is not easy, especially with the funding demands of ongoing combat operations. Therefore, instead of dictating specific legislative guidance for fiscal year 2010, the conferee's urge the Army in 2010 to reassess its tactical radio requirements, make all needed adjustments based on force structure and programmatic changes, and deliver to Congress as part of its fiscal year 2012 budget submission a new comprehensive tactical radio plan that addresses the numerous concerns expressed by Congress. The conferees also urge senior Army and DOD leaders to take a direct role in developing this new plan, in order to ensure that the various competing interests and demands within the Army are reconciled and accounted for in the new path forward.

*Competitive bidding for procurement of steam turbines for ship service turbine generators and main propulsion turbines for Ohio-class submarine replacement program*

The Senate bill contained a provision (sec. 115) that would require the Secretary of the Navy to take measures to ensure appropriate competition is conducted for procurement of steam turbines for both the ships service turbine generators and main engines of the Ohio-class submarine replacement program.

The House bill contained no similar provision.

The Senate recedes.

The conferees note that section 202 of the Weapons Systems Acquisition Reform Act of 2009 (Public Law 111-23) requires that the Secretary of Defense ensure that the acquisition strategy for each major defense acquisition program include measures to preserve the option of competition through the life of the program. Such a requirement would apply to the Ohio-class replacement program.

The Secretary of the Navy should consider means of preserving competition for this program at the system, subsystem, and component level to the maximum extent practicable. In particular, the conferees agree that steam turbines for this new class of submarine should be procured in a competitive environment. The conferees direct that, if the Secretary of the Navy were to decide in favor of sole source procurement of steam turbines, the Secretary must forward the justification required by section 2302 of title 10, United States Code, to the congressional defense committees not later than 30 days prior to awarding such a contract.

*Multiyear procurement authority for DDG-51 Burke-class destroyers*

The House bill contained a provision (sec. 125) that would authorize the Secretary of the Navy to enter into a multiyear contract, beginning in fiscal year 2010, for procuring DDG-51 Burke-class destroyers.

The Senate amendment contained no similar provision.

The House recedes.

*Conversion of certain vessels; leasing rates*

The House bill contained a provision (sec. 126) that would permit the Secretary of the Navy to use up to \$35.0 million from the Weapons Procurement, Navy, account to lease and convert vessels that have defaulted on construction loan guarantees: (1) that have become the property of the United States; and (2) for which, the Maritime Administrator has a right of disposal.

The Senate amendment contained no similar provision.

The House recedes.

The conferees agree that the Navy should in trying to make near-term additions to the high speed vessel fleet, consider fully the possibility of using vessels within the control of the Maritime Administration.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND  
EVALUATION

BUDGET ITEMS

*Minerva*

The conferees note the potential of social science research to contribute to vital national security missions. The conferees are concerned over the dearth of social science expertise within the Department, and believe that as new initiatives are started or expanded, such as the Minerva Initiative and the Human Terrain System, that lack of organic expertise is becoming more acute and apparent.

The conference agreement includes an authorization of \$13.3 million in PE 61103A for the Minerva Research Initiative, a portion of the roughly \$20.0 million being requested for this purpose across the Department of Defense. The conferees direct that at least \$5.0 million of the Initiative's fiscal year 2010 funding be used to develop in-house Department of Defense capabilities at defense laboratories and schools consistent with the research goals of the Minerva Initiative. The conferees support the greater development of in-house social science capabilities in order to reduce dependencies on contractors on the battlefield, and to enable the Department to more effectively fund, manage, and oversee extramural social science research activities.

*Electromagnetic gun*

The budget request included \$11.7 million in PE 63004A, \$4.1 million in PE 62618A, and \$6.4 million in PE 61104A for activities related to the Army's Electromagnetic (EM) Gun initiative.

The House bill would authorize the budget request for these programs.
