

# DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATIONS

## TITLE I—PROCUREMENT

### OVERVIEW

The budget request for fiscal year 2012 contained \$111.5 billion for procurement. This represents a \$300.0 million increase over the amount authorized for fiscal year 2011.

The committee recommends authorization of \$111.5 billion, a decrease of \$68.3 million from the fiscal year 2012 request.

The committee recommendations for the fiscal year 2012 procurement program are identified in division D of this Act.

### AIRCRAFT PROCUREMENT, ARMY

#### Overview

The budget request for fiscal year 2012 contained \$7.1 billion for Aircraft Procurement, Army. The committee recommends authorization of \$6.5 billion, a decrease of \$513.9 million, for fiscal year 2012.

The committee recommendations for the fiscal year 2012 Aircraft Procurement, Army program are identified in division D of this Act.

#### Items of Special Interest

##### *Aerial Common Sensor*

The budget request contained \$539.6 million for 18 C-12 aircraft to provide manned airborne intelligence, collection, processing, and targeting support.

The Army had planned to award a low-rate initial production contract for 50 percent of the total projected procurement in late fiscal year 2012. The program has experienced significant delays due to a number of factors, including development contract award protests, shortcomings in the award process, which the Army has taken responsibility for, and a subsequent delay in the development contract award.

The committee recommends \$15.7 million, a decrease of \$523.9 million, for the Aerial Common Sensor to provide manned airborne intelligence, collection, processing, and targeting support.

##### *Airborne Reconnaissance Low*

The Airborne Reconnaissance Low (ARL) is a multifunction, day/night, all weather DHC-7 fixed-wing reconnaissance aircraft. The Army is evaluating options to modernize the ARL fleet. The committee directs the Secretary of the Army to provide a report to the congressional defense committees, the Senate Select Committee on Intelligence, and the House Permanent Select Committee on Intelligence on the current state of the ARL fleet, including reliability and maintainability within 90 days after the date of the enactment of this Act. The report should also include a review of the options currently under consideration for major ARL modernization programs.

*Air filters for National Guard helicopters*

The committee notes that Inlet Barrier Filtration (IBF) and Auxiliary Power Unit (APU) filtration systems capture 99 percent of air particles, including grit and other abrasives that degrade and destroy the internal components of rotorcraft engines. The substantial cost savings in engine repair, overhaul, class 9 replacement parts, and maintenance labor have been well documented throughout the Army and Army National Guard (ARNG). The committee believes that installing IBF and APU filtration systems on these aircraft could reduce maintenance costs and increase readiness rates. The committee encourages the ARNG to fund IBF and APU filtration systems in the future.

*CH-47F Chinook helicopter*

The fiscal year 2012 budget request for the CH-47F Chinook helicopter includes funding for the fifth year of a 5-year multiyear procurement contract. The committee notes that this contract has provided stability to the program and savings to the taxpayer of over \$450.0 million. In view of the continuing need for sustained procurement of the CH-47F, the Army's acquisition strategy calls for a second 5-year multiyear contract beginning in fiscal year 2013. The committee agrees with the Army strategy to continue procurement with substantial cost savings for the CH-47F, and encourages the Department of Defense to include a request for authority for a new multiyear contract in the fiscal year 2013 budget submission.

*UH-72A Lakota helicopter aircraft survivability equipment*

The budget request contained \$250.4 million for procurement of 39 UH-72A Lakota helicopters.

The committee remains supportive of the UH-72A helicopter program. The committee notes that with over 150 aircraft now delivered to the Army on cost and within schedule, the UH-72A has proven to be a robust and efficient multirole platform. The committee understands that the UH-72A has a documented requirement for 210 helicopters to support domestic missions in "permissive" environments. The committee believes that there may be opportunities to leverage this aircraft to meet additional operational needs for the warfighter. However, before this happens, the committee needs to understand how the Army defines "permissive" versus "non-permissive" environments. In addition the committee needs to understand what the associated survivability modifications would be required and if such modifications would be feasible, given size, weight, and power limitations, if the mission envelope of the UH-72A was expanded beyond "permissive" environments.

The committee recommends \$250.4 million, the full amount requested, for procurement of 39 UH-72A Lakota helicopters.

## MISSILE PROCUREMENT, ARMY

## Overview

The budget request for fiscal year 2012 contained \$1.5 billion for Missile Procurement, Army. The committee recommends authorization of \$1.5 billion, a decrease of \$14.5 million, for fiscal year 2012.

The committee recommendations for the fiscal year 2012 Missile Procurement, Army program are identified in division D of this Act.

## WEAPONS AND TRACKED COMBAT VEHICLES, ARMY

### Overview

The budget request for fiscal year 2012 contained \$1.9 billion for Procurement of Weapons and Tracked Combat Vehicles, Army. The committee recommends authorization of \$2.4 billion, an increase of \$427.5 million, for fiscal year 2012.

The committee recommendations for the fiscal year 2012 Procurement of Weapons and Tracked Combat Vehicles, Army program are identified in division D of this Act.

### Items of Special Interest

#### *Abrams tank program National Guard modernization*

The budget request contained \$181.3 million for the Abrams tank upgrade program.

The committee notes that the National Guard currently has six Heavy Brigade Combat Teams (HBCT) that consist of the Abrams M1A1 tank which is an analog based system and active duty HBCTs operate the more modern M1A2 tank which uses a digital system. The committee also notes that there are significant differences in capability, particularly for growth and survivability between the M1A1 and M1A2 SEP (version 2) that now is being produced under the current Multi-Year Procurement contract. The committee understands that under the original Future Combat Systems (FCS) strategy, the Army planned to cascade the M1A2 tanks to the National Guard. However, as a result of the termination of the FCS program, the Army has yet to develop a plan to modernize the National Guard HBCT in the near term. Given the Army's top development project is currently the tactical "network," which requires a digital capability, the committee believes the National Guard needs the M1A2 tank in order to stay aligned with the Army's tactical network strategy.

The committee further notes that the Army must maintain the ability for its Heavy Brigade Combat Teams to overmatch any possible threat in the future. The committee is concerned that even with the funds requested for fiscal year 2012, the Abrams tank production would shut down in fiscal year 2013, and the Army is unsure that the production line and supporting industrial base would be available when it starts future upgrades to Abrams tanks in fiscal year 2016. The committee believes that the Army must rapidly accelerate future Abrams tank upgrades, or it must continue production of the most capable version of the M1 Abrams until the upgrade program begins. The committee believes that the most prudent course of action is to bridge the planned production gap with production of the most capable version of the M1 tank, the M1A2 system enhancement program version 2 (M1A2 SEPv2), at the most economical rate possible. The committee also believes that the cost of shutting down and then restarting the Abrams production line would be significant and may cost as much as it would to "pure

fleet” the National Guard with the most modern version of Abrams tanks.

The committee recommends \$453.3 million, an increase of \$272.0 million, for the Abrams tank upgrade program to procure additional M1A2 SEPv2 tanks using the current multi-year contract, with the additional tanks being used to replace less capable versions of the M1 tank in the Army National Guard or prepositioned equipment sets.

#### *Bradley fighting vehicle program*

The budget request contained \$250.7 million for the Bradley fighting vehicle (BFV) program.

The committee is concerned that despite these funds, Bradley fighting vehicle production will effectively shut down for as long as 2 years, and that the Army cannot be sure that the production line and supporting industrial base will be available when it plans to restart production of upgraded Bradley vehicles in the future. The committee notes that second-tier suppliers of key components are already shutting down or planning to do so in the near future. The committee believes that a more prudent course of action is to bridge the production gap with continued production of the most capable version of the Bradley fighting vehicle, the M2A3, or pursuit of an interim upgrade program for the existing M2A3 fleet. Should the Army choose to produce more M2A3's, the committee believes that the Army could provide these vehicles to the Army National Guard, elements of the active Army not yet equipped with M2A3's, or prepositioned equipment sets. If the Army instead pursues an interim upgrade program for the current fleet of M2A3's, the committee encourages the Army to consider technology insertions to address vehicle power and survivability requirements.

The committee recommends, \$403.7 million, an increase of \$153.0 million, for the Bradley fighting vehicle program.

#### *M4 carbine product improvement program*

The budget request contained \$25.1 million for M4 carbine modifications, of which \$14.6 million was for the M4 carbine product improvement program (PIP).

The committee understands the M4/M4A1 carbine product improvement program is a multi-phased incremental program to enhance its reliability, durability, maintainability, sustained rate of fire, and ergonomics. The committee notes the M4 carbine PIP consists of two phases, composed of multiple increments within each phase. The committee is aware the program is not fully resourced to meet operational needs and has significant unfunded requirements across the Future Years Defense Program.

The committee supports this M4/M4A1 PIP effort and encourages the Army to pursue best value, full and open competition for each phase and increment to include commercial-off-the-shelf solutions. The committee also encourages the Secretary of the Army to adequately resource this effort.

The committee recommends \$14.6 million, the full amount of the request, for the M4/M4A1 PIP effort.

*Stryker vehicles*

The budget request contained \$685.8 million for procurement of 100 Stryker nuclear, biological, and chemical (NBC) reconnaissance vehicles and modifications to existing Stryker vehicles.

The committee is concerned about the unstable requirements and continually changing production plans for Stryker vehicles and modifications. The committee notes that in addition to the 100 vehicles requested in fiscal year 2012, the Army has validated unfunded requirements for 513 additional Stryker vehicles of various models. However, the committee notes that the Army now has in its inventory more than 400 Stryker vehicles in its ready-to-fight or depot repair cycle float fleets. The committee believes that increasing the size of the Stryker vehicle fleet beyond those vehicles that are resident in Stryker brigades is excessive. The Army should distribute or modify those Stryker vehicles to fulfill unmet validated requirements before increasing production of new Stryker vehicles beyond the 100 NBC reconnaissance variants requested in fiscal year 2012. Elsewhere in this title, the committee includes a provision that would limit the use of fiscal year 2012 procurement funds until the Secretary of the Army provides information clarifying the Army's future Stryker vehicle production plans.

The committee recommends \$685.8 million, the full amount requested, for procurement of 100 additional Stryker NBC reconnaissance vehicles and modifications to existing Stryker vehicles.

## PROCUREMENT OF AMMUNITION, ARMY

## Overview

The budget request for fiscal year 2012 contained \$2.0 billion for Procurement of Ammunition, Army. The committee recommends authorization of \$2.0 billion, no change to the budget request, for fiscal year 2012.

The committee recommendations for the fiscal year 2012 Procurement of Ammunition, Army program are identified in division D of this Act.

## OTHER PROCUREMENT, ARMY

## Overview

The budget request for fiscal year 2012 contained \$9.7 billion for Other Procurement, Army. The committee recommends authorization of \$9.5 billion, a decrease of \$170.8 million, for fiscal year 2012.

The committee recommendations for the fiscal year 2012 Other Procurement, Army program are identified in division D of this Act.

## Items of Special Interest

*Body armor investment strategy*

The committee notes that section 141 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84) required the Secretary of Defense to establish procurement line items and research and development program elements for body armor

programs. The committee notes the Secretary of Defense has failed to establish procurement line items and as a result, the committee is concerned about the long term investment strategy for body armor. The committee understands that under the Department's existing budgetary policy, funding to procure body armor, clothing, and other personal protective gear is typically included in the Operation and Maintenance appropriations account and is categorized as an "expendable" item. The committee is aware that the O&M appropriation accounts allow for greater flexibility in funding based on dynamic annual program requirements. The committee also notes that establishing a separate, procurement line item would not prevent the Department from continuing to use the O&M appropriation for sustainment purposes or limit the military departments' ability to use rapid acquisition authorities to ensure the fastest possible exploitation of body armor material improvements, production, or fielding.

The committee believes that establishing an individual procurement line item would generate better accountability and transparency in long term planning, programming, and investment by the military services for the acquisition of body armor. Further, a long term investment strategy based on future requirement estimates could better position the body armor industrial base to rapidly respond to new threats or requirements as well as accelerate the amount of industry investment to further advancements in survivability and weight reduction.

Therefore, the committee directs the Under Secretary of Defense for Acquisition, Technology, and Logistics to notify the congressional defense committees in writing beginning 90 days after the date of enactment of this Act on the actions being taken by the Department to comply with the creation of a procurement line item required by section 141 of the National Defense Authorization Act for Fiscal Year 2010 or provide justification for having not complied with the requirement. The committee further directs the Under Secretary to review the current definition of "expendable items" and determine whether body armor should still be considered an expendable item rather than a program system and to report the findings to the congressional defense committees within 60 days after the date of enactment of this Act.

#### *Body armor requirements generation and weight reduction initiatives*

The committee believes body armor requirements for the military services should be coordinated through the Joint Capabilities Integration and Development System process. The committee encourages the Joint Requirements Oversight Council to review and, if required, update the current body armor requirements document through capabilities based assessments that would clearly define current and future force requirements, particularly in the area of weight reduction versus protection. The committee notes that the tradeoff between protection capabilities and weight is a major cost driver in body armor procurements. The committee is aware that available technology has not been able to keep the body armor system within the users' desired weight without sacrificing performance.

The committee continues to recognize the critical importance of reducing the warfighters carrying combat load for current operations, specifically Operation Enduring Freedom (OEF), and considers this a high priority issue. The committee notes that body armor, along with water and ammunition, make up most of an individual's equipment weight, and that most operations in the Islamic Republic of Afghanistan are dismounted operations. The committee believes there should be greater urgency in providing appropriate levels of equipment to warfighters in OEF that would allow small unit commanders to better tailor mission equipment to effectively meet operational requirements. The committee believes the Department should incentivize the industrial base to achieve greater advancements in weight reduction technology that could reduce the individual carrying combat load, most notably in body armor.

#### *Information management system for the National Guard*

The committee believes that the National Guard Bureau Weapons of Mass Destruction Civil Support Teams (WMD CST) play an important role in support to civil authorities at a domestic Chemical, Biological, Radiological, Nuclear, and High Explosive (CBRNE) incident site. The committee is aware that a tactical information management system has been fielded to the CST's to provide crucial command, control, and communications capabilities. The committee is also aware that in the event of such an incident, National Guard assets such as the CBRNE Enhanced Response Force Package and Homeland Defense Response Force units could deploy to support the CST's. Therefore, to ensure connectivity and unity of effort of all deployed National Guard assets, the committee encourages the National Guard Bureau to expand the CST information management system to these follow-on forces.

#### *Joint Tactical Radio System*

The budget request contained \$775.8 million for the Joint Tactical Radio System (JTRS) program. Of this amount, \$204.8 million was for Ground Mobile Radio (GMR), \$426.2 million was for Handheld, Manpack and Small Form Fit (HMS) radio, and \$144.8 million was for Airborne and Maritime/Fixed (AMF) station radio.

The committee remains supportive of the JTRS program and understands that the Army has made progress in its tactical network strategy, of which JTRS is a key component. The committee supports the Army's plan to pursue non-proprietary waveforms, and its plan to conduct full and open competition during full-rate production.

The committee encourages the Army to pursue full and open competition of the HMS radios prior to full rate production, if feasible, to ensure the best product is available to the warfighter at the best price. Such acquisition and contracting must fit within the competition focused elements of the Secretary of Defense's efficiency initiatives.

The committee understands that the Army is likely to lower its current basis of issue of GMR radios for Brigade Combat Teams (BCT). In addition, when factoring in the fiscal year 2011 and 2012 requests the Army has requested procurement of almost 10 brigade sets of GMR radios. Therefore, elsewhere in this title, the committee includes a provision that would restrict the use of fiscal year

2012 procurement funds until the Secretary of the Army submits to the congressional defense committees written certification that the acquisition strategy for full-rate production includes full and open competition. In addition, the committee recommends a reduction in funds for GMR procurement due to a lack of clarity regarding the Army's overall requirements for GMR radios.

The committee recommends \$716.0 million, a decrease of \$35.8 million, for the JTRS GMR program, and a decrease of \$24.0 million for the Maritime/Fixed station program.

#### *Light tactical vehicle investment strategy*

The budget request contained \$161.6 million to recapitalize 1,362 high mobility multi-purpose wheeled vehicles (HMMWVs).

The committee understands the military services, in coordination with the Office of the Secretary of Defense, are continuing to update and refine their investment strategies for their respective light tactical wheeled vehicles (LTV) and continue to seek a balance of affordable capabilities across their light tactical vehicle (LTV) fleets. The committee notes the military services' LTV fleets consist primarily of unarmored and armored HMMWVs and will also include the future Joint Light Tactical Vehicle (JLTV) program. The committee understands that due to affordability concerns, the Army and the Marine Corps are planning to reduce their LTV fleets by approximately 15 percent and 25 percent, respectively, over the next five years. The committee understands the Army has acknowledged that a significant risk to their strategy is the availability of expected TWV procurement funds and as a result the committee has concerns over adequately maintaining the LTV industrial base.

The committee also understands that the Army and the Marine Corps both plan to competitively recapitalize their respective Up-Armor HMMWV (UAH) fleets with improvements to automotive performance and survivability in order to improve overall capability and extend life cycles. The committee is aware that the Army and the Marine Corps plan on retaining HMMWVs and UAHs in their inventories over the next 20 years and will use them extensively. The committee notes the competitive approach to improving the Army and the Marine Corps UAH fleets would be based on a best value, full and open competition beginning in fiscal year 2013 among public, private, and/or public-private partnerships. The committee supports this plan and encourages the Army and the Marine Corps to accelerate this program as a means to stabilize the LTV industrial base and provide a bridge to the JLTV program. The committee also expects the Army and the Marine Corps to coordinate on establishing joint requirements and resources for this program.

Further, the committee is aware of the Defense Advanced Research Projects Agency's (DARPA) recent initiatives, in partnership with the Army and the Marine Corps, aimed at enhancing HMMWV survivability for the warfighter through the integration of "structural blast chimney" technology on original equipment manufacturer-produced HMMWVs. The committee understands DARPA is conducting ballistic, mobility, and reliability tests and that initial ballistic test results have indicated improvements to vehicle and warfighter survivability without increasing overall vehi-

cle weight. The committee supports this effort and expects this technology would be considered, pending favorable test results, as part of the UAH competitive recapitalization program and would encourage the acceleration of this program.

The committee recommends \$161.6 million, the full amount of the request, for the current HMMWV recapitalization program and encourages the Army and the Marine Corps to adequately resource and accelerate the UAH competitive recapitalization program.

#### *M915 line haul tractor trailer acquisition strategy*

The budget request contained \$1.4 million for procurement of six M915 and M916 line haul tractor trailer trucks.

The committee notes the current \$51.0 million funding profile for fiscal years 2011–16 would only procure 115 M915A5s. The committee encourages the Secretary of the Army to consider a full and open competition for any new future procurement should the M915 requirement increase. The committee also understands the Army Reserve has significant unfunded requirements for its M915 truck fleet and encourages the Secretary of the Army to develop courses of action that would accelerate meeting these requirements in a timely manner.

The committee recommends \$1.4 million, the full amount of the request, for the procurement of six M915 and M916 line haul tractor trailer trucks.

#### *Tactical wheeled vehicle acquisition strategy*

The committee believes the sustainment of the tactical wheeled vehicle (TWV) industrial base could be affected by many operational and affordability challenges across the Future Years Defense Program. The Army's current TWV acquisition strategy employs a near-term investment plan of just over \$1.0 billion per year, slowly rising to approximately \$2.5 billion per year through fiscal year 2025. The Secretary of the Army has indicated that these projected funding levels will not support continuation of the prior pace of TWV modernization, replacement, and recapitalization. In light of current budget constraints, the committee encourages the Secretary of the Army and the Secretary of the Navy, in coordination with industry, to jointly consider requesting multi-year contracting authority as a means to generate potential cost savings and sustain an efficient and cost effective TWV industrial base.

#### *Weapon light upgrades*

The budget request contained \$156.2 million for Night Vision Devices. Of this amount, no funds were requested for upgrade kits for Millennium Universal (MU) series weapon lights.

The committee notes that the current Army inventory of approximately 100,000 MU series weapon lights incurs substantial cost to the Army due to battery replacement rates. The committee understands that retrofitting these weapon lights using the V-series KM4 upgrade kit, or other upgrade kits, may significantly reduce battery replacement demand, resulting in substantial annual savings to the Government. The committee encourages the Secretary of the Army to review options for weapon light upgrade kits in order to determine if any meet requirements and could produce the substantial savings due to lower battery usage.

The committee recommends \$156.2 million, the full amount of the request, for Night Vision Devices.

## JOINT IMPROVISED EXPLOSIVE DEVICE DEFEAT FUND

### Overview

The budget request for fiscal year 2012 contained \$220.6 million for the Joint Improvised Explosive Device Defeat Fund. The committee recommends authorization of \$220.6 million, no change in the budget request, for fiscal year 2012.

The committee recommendations for the fiscal year 2012 Joint Improvised Explosive Device Defeat Fund are identified in division D of this Act.

### Items of Special Interest

#### *Efforts to mitigate the improvised explosive device threat to dismounted operations*

The committee understands that the number of dismounted operations conducted by U.S. and coalition forces continue to rise in the Islamic Republic of Afghanistan. The committee notes that although overall enemy improvised explosive device (IED) efficacy has decreased since October 2010, primarily due to early detection from dismounted forces, the severity of casualties increase when a dismounted IED effective attack occurs. The committee believes that efforts to mitigate the IED threat to dismounted forces should be a top priority for the Department of Defense.

The committee recognizes that many mitigation efforts are currently being developed and procured by the Joint IED Defeat Organization (JIEDDO) to counter the IED threat to dismounted forces. The committee also recognizes that a holistic approach is required that entails improved pre-deployment training, tactics, procedures, and availability of equipment to readily address capability gaps. The committee notes that JIEDDO is actively pursuing unmanned ground vehicles (UGVs) as a counter-IED solution to the IED threat to dismounted forces. The committee understands that JIEDDO has engaged industry and other Department of Defense agencies for potential UGV solutions that could be rapidly developed and fielded and encourages the aggressive pursuit to rapidly field a solution. The committee believes potential interim solutions would be operationally effective and should be considered for fielding, concurrent to pursuing a solution that meets and addresses all requirements as a means to mitigate the IED threat to dismounted forces.

#### *Joint Improvised Explosive Device Defeat Organization*

The budget request contains \$2.8 billion for the Joint Improvised Explosive Device Defeat Organization (JIEDDO).

The committee understands JIEDDO was established in February 2006 to “lead, advocate, and coordinate all DOD actions . . . to defeat IEDs as weapons of strategic influence.” The committee expects improvised explosive devices (IEDs) to remain an enduring threat to U.S. forces. The committee notes that Congress has provided approximately \$19.7 billion to JIEDDO to counter the IED threat and that JIEDDO has reported significant progress in the

counter-IED (C-IED) fight in the Islamic Republic of Afghanistan and in the Republic of Iraq. For instance, the committee understands enemy IED efficacy in Afghanistan has decreased since October 2010. The committee commends JIEDDO's efforts to rapidly develop, procure, and field programs to mitigate the IED threat in response to urgent operational needs. To build on the considerable progress made, the committee, in collaboration with the Government Accountability Office, will continue to conduct oversight of JIEDDO's capability to effectively manage and evaluate C-IED programs.

The committee recommends \$2.8 billion, the full amount of the request, for JIEDDO.

## AIRCRAFT PROCUREMENT, NAVY

### Overview

The budget request for fiscal year 2012 contained \$18.6 billion for Aircraft Procurement, Navy. The committee recommends authorization of \$18.6 billion, an increase of \$4.5 million, for fiscal year 2012.

The committee recommendations for the fiscal year 2012 Aircraft Procurement, Navy program are identified in division D of this Act.

### Items of Special Interest

#### V-22

The budget request contained \$2.2 billion for the procurement of V-22 aircraft.

The committee understands that the Department of Defense is considering a follow-on multi-year procurement strategy for the V-22 program starting in fiscal year 2013. The multi-year procurement contract for fiscal years 2008-2012 provided stability to the program and savings of over \$420.0 million compared to single-year contracts.

The committee notes that since 2007, the V-22 has performed 14 overseas deployments for the Marine Corps and Air Force Special Operations Forces in demanding environments under war time operational tempo, and understands that improvements in mission capable readiness rates across the fleet and decreases in costs per flight hour have been made as the aircraft has achieved its first 100,000 flight hours. The committee expects the Department of Defense to continue its focus on supply chain efficiency, maintenance best practices, and high reliability of select components in order to continue improvements to mission capable rates and decreased costs per flight hour. In view of the continuing need for sustained procurement of the V-22, the committee urges the Department of Defense to consider a request for authorization of a new multi-year procurement contract beginning in fiscal year 2013.

The committee recommends \$2.2 billion for the procurement of V-22 aircraft.

## WEAPONS PROCUREMENT, NAVY

## Overview

The budget request for fiscal year 2012 contained \$3.4 billion for Weapons Procurement, Navy. The committee recommends authorization of \$3.4 billion, an increase of \$5.0 million, for fiscal year 2012.

The committee recommendations for the fiscal year 2012 Weapons Procurement, Navy program are identified in division D of this Act.

## PROCUREMENT OF AMMUNITION, NAVY AND MARINE CORPS

## Overview

The budget request for fiscal year 2012 contained \$720.0 million for Procurement of Ammunition, Navy and Marine Corps. The committee recommends authorization of \$720.0 million, no change to the budget request, for fiscal year 2012.

The committee recommendations for the fiscal year 2012 Procurement of Ammunition, Navy and Marine Corps program are identified in division D of this Act.

## Items of Special Interest

*Laser guided air-launched rockets*

The budget request contained \$118.4 million for airborne rockets, all types. Of this amount, no funds were requested for upgrading 5-inch diameter unguided rockets into 5-inch precision laser guided rockets.

The committee is aware that the Marine Corps has requested through the universal urgent need statement process a laser guided 5-inch precision rocket to strike both fixed and moving targets effectively from tactical aircraft and rotorcraft. The committee is aware the Department of the Navy has performed successful test firings of 5-inch diameter laser guided rockets against both fixed and moving targets. The committee supports the Secretary of the Navy's actions to rapidly address this urgent operational need for the warfighter. The committee encourages the Secretary of the Navy to continue to move aggressively to adequately fund, procure, and field a 5-inch precision laser-guided rocket through the rapid acquisition process in order to meet this urgent operational need.

The committee recommends \$118.4 million for airborne rockets, all types.

## SHIPBUILDING AND CONVERSION, NAVY

## Overview

The budget request for fiscal year 2012 contained \$14.9 billion for Shipbuilding and Conversion, Navy. The committee recommends authorization of \$14.9 billion, a decrease of \$50.0 million, for fiscal year 2012.

The committee recommendations for the fiscal year 2012 Shipbuilding and Conversion, Navy program are identified in division D of this Act.

## Items of Special Interest

*Amphibious Assault Ship*

The budget request contained \$2.0 billion for the detail design and construction of the amphibious assault ship designated LHA-7.

The delivery of the first ship of the America-class, LHA-6, has been significantly delayed. According to the Department of Defense "Selected Acquisition Report" of December 31, 2010, the delays are "due to changing conditions in the shipyard portfolio which are driving labor demands in various trades". These delays have had a cascading effect on LHA-7, which was scheduled to go on contract for detail design and construction in November 2010, but now the Navy estimates the contract will be delayed until the end of fiscal year 2011. Elsewhere in this title, the committee includes a provision that would authorize the Navy to conclude funding for LHA-7 in fiscal year 2013.

The committee recommends \$2.0 billion, a decrease of \$50.0 million, for LHA-7.

*Navy Shipbuilding Program*

The budget request contained \$14.9 billion for Shipbuilding and Conversion, Navy.

The committee is pleased that the Navy has turned around the downward spiral in battle force ship quantities, and the plan to achieve the floor of 313 ships appears to be achievable. To obtain the required capability and to provide the required stability to the fragile shipbuilding industrial base, the committee believes the following programs are crucial.

CVN-78 is the lead ship of the *Ford*-class of aircraft carriers. The committee was critical when the Navy changed construction starts of these carriers from 4-year to 5-year centers. The committee encourages the Secretary of the Navy to keep these aircraft carriers on 5-year centers at the most, with fiscal year 2013 being the first year of detail design and construction funding for CVN-79. The committee believes one key to success in this program will be to minimize changes from ship to ship in the class.

The *Virginia*-class submarine program has proven itself to be a model shipbuilding program. Cost reduction efforts and ever-decreasing span time for construction and delivery allowed the Navy to fund two ships a year starting in fiscal year 2011, 1 year earlier than previously planned. The committee believes that modularity of payloads and open interfaces for its weapons systems, including electronic warfare, will improve capability while being more affordable. To continue to get the most efficiency from this program, the committee encourages the Secretary of the Navy to ensure that advance procurement for the next block of *Virginia*-class submarines is funded to required levels.

Perhaps the most worrisome aspect of the shipbuilding program is that it will be difficult to fund and maintain the current plan once the Navy begins to acquire replacements for the *Ohio*-class ballistic missile submarine fleet. In testimony before the Subcommittee on Seapower and Projection Forces, Navy officials suggested that there may be options to fund these boats outside of the Shipbuilding and Conversion, Navy account. The committee be-

lieves that the industrial teaming arrangement has been successful on the *Virginia*-class submarine program and would encourage the Secretary of the Navy to use the capabilities of both submarine shipbuilders in crafting an affordable acquisition strategy for the *Ohio*-class Replacement Program.

The re-start of the DDG-51 *Arleigh Burke*-class of destroyers is an important step in maintaining highly capable surface combatants in sufficient quantities, especially given the increased reliance on these ships to provide additional ballistic missile defense capabilities. Elsewhere in this title, the committee includes a provision that would grant multi-year procurement contract authority for these ships. The committee encourages the Secretary of the Navy to continue pursuing an open architecture, data sharing approach to the maintenance and sustainability of existing weapons systems. This approach will allow for more competition and affordable upgrades.

The committee received testimony that the Marine Corps' requirement for amphibious ships is 38 ships, but that the number of ships that are absolutely necessary with acceptable risk is 33. The committee encourages the Secretary of the Navy to continue pursuing a minimum of 33 amphibious ships.

#### OTHER PROCUREMENT, NAVY

##### Overview

The budget request for fiscal year 2012 contained \$6.3 billion for Other Procurement, Navy. The committee recommends authorization of \$6.3 billion, an increase of \$7.6 million, for fiscal year 2012.

The committee recommendations for the fiscal year 2012 Other Procurement, Navy program are identified in division D of this Act.

#### PROCUREMENT, MARINE CORPS

##### Overview

The budget request for fiscal year 2012 contained \$1.4 billion for Procurement, Marine Corps. The committee recommends authorization of \$1.4 billion, an increase of \$1.0 million, for fiscal year 2012.

The committee recommendations for the fiscal year 2012 Procurement, Marine Corps program are identified in division D of this Act.

#### AIRCRAFT PROCUREMENT, AIR FORCE

##### Overview

The budget request for fiscal year 2012 contained \$14.1 billion for Aircraft Procurement, Air Force. The committee recommends authorization of \$14.1 billion, an increase of \$43.5 million, for fiscal year 2012.

The committee recommendations for the fiscal year 2012 Aircraft Procurement, Air Force program are identified in division D of this Act.

## Items of Special Interest

*B-1 bomber aircraft force structure*

The committee understands that in fiscal year 2012 the Air Force plans to retire 6 B-1 bomber aircraft and reduce the current combat-coded force structure from 36 B-1 bomber aircraft down to 30. The committee supports the Air Force's plan to retire 6 B-1 bomber aircraft but does not support the plan to reduce the combat-coded force structure of B-1 bomber aircraft.

In a report titled "2007 Long-Range Strike White Paper" required by the committee report (S. Rept. 109-254) accompanying the National Defense Authorization Act for Fiscal Year 2007, the Air Force stated that 96 combat-coded bomber aircraft total (36 B-1s, 16 B-2s, and 44 B-52s) were required to meet combatant commander requirements until a next-generation long-range strike aircraft is fielded. Furthermore, the 2010 Quadrennial Defense Review validated the requirement to maintain up to 96 combat-coded bomber aircraft.

Elsewhere in this title, the committee includes a provision that would permit the Secretary of the Air Force to retire 6 B-1 bomber aircraft but would require the Secretary to maintain a combat-coded inventory of 36 B-1 bomber aircraft. The committee is concerned that retirement of any B-1 aircraft is premature prior to a replacement long-range strike bomber aircraft reaching initial operational capability status.

*Common vertical lift support platform*

The budget request contained \$52.8 million for procurement of two common vertical lift support platform (CVLSP) helicopters. The budget request also contained \$5.4 million in title II of this Act for research, development, test, and evaluation activities associated with the CVLSP program.

The CVLSP program is a new start for fiscal year 2012 that would eventually procure 93 non-developmental helicopters to provide vertical lift support for nuclear weapons convoy escort, emergency security response, National Capitol Region transport, and other Air Force missions with improved speed, range, capacity, and survivability.

The committee notes that the Air Force plans to procure an in-production, non-developmental, government off-the-shelf, or commercial off-the-shelf aircraft for this purpose, and that the total development cost throughout the Future Years Defense Program is budgeted for \$29.4 million. The committee expects the Department of the Air Force to adhere to this strategy to minimize development and procurement costs.

The committee recommends \$52.8 million for procurement of two CVLSP helicopters and \$5.4 million for research, development, test, and evaluation activities associated with the CVSLP program.

*Global Hawk*

The budget request contained \$607.8 million for procurement of RQ-4 Global Hawk unmanned aerial systems (UAS).

The committee is aware this platform is a critical high-demand, low-density intelligence, surveillance, and reconnaissance (ISR) asset that is being used extensively and effectively to perform crit-

ical missions in Operation New Dawn and Operation Enduring Freedom. The committee also notes that this platform is being used effectively in global humanitarian and recovery operations. The committee supports the Global Hawk UAS program and should the Secretary of Defense determine that additional Global Hawk UAS are required, then the committee encourages using funds contained within this Act for the purposes of addressing those requirements.

The committee recommends \$607.8 million, the full amount of the request, for Global Hawk UAS.

#### *Intra-theater and inter-theater airlift programs*

The budget request contained \$396.8 million for C-17 modernization, \$1.1 billion for the C-5 Reliability Enhancement and Re-engineering program, \$141.3 million for procurement of 1 C-130H/J aircraft, \$1.1 billion for procurement of 10 HC/MC/AC-130 aircraft, and \$571.6 million for 9 C-27J aircraft.

The committee notes in regards to inter-theater airlift aircraft programs, the Secretary of the Air Force requested to repeal section 8062(g) of title 10, United States Code, which provides that the Secretary of the Air Force maintain a minimum inventory of 316 strategic inter-theater airlift aircraft. The committee does not support repeal and believes that a minimum inventory of 316 airlift aircraft provides a prudent balance of operational risk, affordability and sufficient organic capabilities in meeting the ever-increasing mobility requirements in support of the National Military Strategy and combat operations. The committee's rationale stems from concerns regarding the future viability of the Civil Reserve Airlift Fleet, the reliance of transporting oversize and outsize cargo using foreign aircraft leasing arrangements, the unforeseen over-utilization rates of the current fleet of inter-theater airlift aircraft, the consistent under-estimation of deploying units Time-Phased Force and Deployment Data regarding the amount of equipment to support combat operations, and the Mobility Capability and Requirements Study does not address or characterize the operational risk in meeting combatant commander warfighting requirements or timelines.

The committee notes in regards to intra-theater airlift aircraft programs, that the Department of Defense continues to struggle with sufficiently, and comprehensively, analyzing and defining intra-theater airlift mobility requirements for active and reserve components, as well as National Guard units supporting both title 10 and title 32, United States Code, airlift mobility operations. The committee continues to believe that a reduction in the C-130H/J inventory from 395 to 335 aircraft, a reduction in the inventory of C-27J aircraft from 78 to 38, and a wholesale inventory reduction by the Army of 42 C-23 aircraft is unjustified, premature and based on insufficient analytics, and moreover, executed for budgetary reasons. Furthermore, the committee understands that neither the 2006 Mobility Capability Study or the 2010 Mobility Capability and Requirements Study did not comprehensively analyze all aspects of intra-theater airlift requirements in the mission areas of time sensitive-direct support, homeland security, Air Force and Army National Guard domestic airlift operations in support of contingencies resulting from natural disasters, humanitarian crises, emergencies, and combatant commander warfighting requirements.

Unless the Department has analysis that indicates the original requirement for 78 C-27J aircraft is no longer valid, the committee supports the procurement of 9 C-27J aircraft in fiscal year 2012 and the acquisition of C-27Js in fiscal year 2013 and beyond to meet the requirements of the National Guard. Without a comprehensive analysis of the aforementioned mission areas, it is impossible to justify such a decrease in intra-theater airlift capabilities.

In the committee report (H. Rept. 110-652) accompanying the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009, the committee expressed concerns regarding the C-27J program. On April 29, 2011, the Secretary of the Air Force notified the committee that the program unit cost of the aircraft had grown from the April 2008 program baseline by \$8.7 million per aircraft and the estimated operations and sustainment costs of the aircraft had grown by \$1.5 billion, resulting in a significant Nunn-McCurdy breach. An aircraft quantity decrease of 78 to 38 total aircraft and an immature sustainment plan from the original program of record were primary contributing factors to the Nunn-McCurdy breach.

Elsewhere in this title, the committee includes a provision that would prohibit the Secretary of the Army from retiring C-23 aircraft until one year after the Director of the National Guard, in consultation with the Chief of Staff of the Army, the Chief of Staff of the Air Force, Commander, U.S. Northern Command, Commander, U.S. Pacific Command, and the Administrator of the Federal Emergency Management Agency submits an intra-theater airlift study to the congressional defense committees that incorporates a comprehensive review of intra-theater airlift requirements for both title 10, United States Code, and title 32, United States Code operations. Lastly, if the intra-theater airlift requirements of the study are not sufficiently supported by the currently planned intra-theater airlift force structure of the Department of Defense, the committee encourages the Department to procure the most cost-effective and mission-effective airlift aircraft to meet requirements.

## PROCUREMENT OF AMMUNITION, AIR FORCE

### Overview

The budget request for fiscal year 2012 contained \$539.1 million for Procurement of Ammunition, Air Force. The committee recommends authorization of \$539.1 million, no change to the budget request, for fiscal year 2012.

The committee recommendations for the fiscal year 2012 Procurement of Ammunition, Air Force program are identified in division D of this Act.

## MISSILE PROCUREMENT, AIR FORCE

### Overview

The budget request for fiscal year 2012 contained \$6.1 billion for Missile Procurement, Air Force. The committee recommends authorization of \$6.5 billion, an increase of \$416.0 million, for fiscal year 2012.

The committee recommendations for the fiscal year 2012 Missile Procurement, Air Force program are identified in division D of this Act.

## OTHER PROCUREMENT, AIR FORCE

### Overview

The budget request for fiscal year 2012 contained \$17.6 billion for Other Procurement, Air Force. The committee recommends authorization of \$17.6 billion, a decrease of \$6.0 million, for fiscal year 2012.

The committee recommendations for the fiscal year 2012 Other Procurement, Air Force program are identified in division D of this Act.

## PROCUREMENT, DEFENSE-WIDE

### Overview

The budget request for fiscal year 2012 contained \$5.4 billion for Procurement, Defense-Wide. The committee recommends authorization of \$5.1 billion, a decrease of \$218.2 million, for fiscal year 2012.

The committee recommendations for the fiscal year 2012 Procurement, Defense-Wide program are identified in division D of this Act.

### Items of Special Interest

#### *Innovative titanium manufacturing processes*

The budget request contained \$19.9 million for Defense Production Act purchases. Of this amount, no funds were requested for innovative titanium and titanium alloy manufacturing processes.

The committee notes a high strength-to-weight ratio and resistance to corrosion make titanium and titanium alloys a critical component of many military platforms. However, the conventional, highly energy intensive process for producing titanium can be costly and often require long lead times. The committee encourages the Secretary of Defense to invest in innovative titanium and titanium alloy manufacturing processes capable of producing high-quality, lower cost titanium products.

The committee recommends \$19.9 million, the full amount of the request, for the Defense Production Act.

#### *Non-Standard Aviation and Aviation Foreign Internal Defense*

The budget request contained \$272.6 million for Non-Standard Aviation and Aviation Foreign Internal Defense, and \$8.5 million for Overseas Contingency Operations for a total of \$281.1 million.

The committee notes that of this request, \$110.0 million will support new procurements and program growth for aviation foreign internal defense.

The committee recommends \$231.1 million, a decrease of \$50.0 million, for Non-Standard Aviation and Aviation Foreign Internal Defense.

### *Special operations combatant craft systems*

The budget request contained \$6.9 million for special operations combatant craft systems.

The committee notes that U.S. Special Operation Command's fleet of Naval Special Warfare Rigid Inflatable Boats (NSW RIB) will be drawn down through fiscal year 2017. The committee also notes that the Mk V platform will leave service beginning in fiscal year 2012, and that the Combatant Craft Medium Mk1 (CCM Mk1) platform is projected to fill this important capability requirement for maritime special operations forces. However, the committee understands that delays in the CCM Mk1 program have created a capability gap in combatant craft that would potentially result in the number of available combatant craft falling below operational requirements, thus requiring a bridging strategy until the CCM Mk1 is fully fielded by fiscal year 2020. The committee believes this potential gap represents a serious national security concern as special operations forces are increasingly called upon to operate in a maritime environment.

Therefore the committee recommends \$66.9 million, an increase of \$60.0 million, for special operations combatant craft systems to satisfy critical maritime requirements and address the capability gap created as the NSW RIB and Mk V Special Operations Craft fleets retire.

### *Special operations communications equipment and tactical radio systems*

The budget request contained \$87.5 million for special operations communications equipment and electronics. The budget request also contained \$76.5 million for special operations tactical radio systems.

The committee notes that military operations in the Islamic Republic of Afghanistan and elsewhere are increasingly distributed and heavily reliant upon a robust communications infrastructure and capability. The communications requirements for special operations forces continue to grow at a rapid pace, reflecting the remote locations from which these forces operate, the close work with local security forces, and the expansion of the U.S. footprint in key areas throughout the Islamic Republic of Afghanistan. The committee recognizes the critical importance communications systems will have in supporting a successful military strategy and protecting U.S. forces.

Therefore, the committee recommends \$150.3 million, an increase of \$62.8 million, for special operations communications equipment and electronics to meet increased communications requirements for special operations forces. In addition, the committee recommends \$101.5 million, an increase of \$25.0 million for special operations tactical radio systems to meet increased tactical communications requirements for special operations forces.

### *Standard missile-3 interceptors*

The budget request contained \$565.4 million for procurement of Aegis ballistic missile defense (BMD) for the Missile Defense Agency (MDA).

The request would support the production of 46 standard missile-3 (SM-3) Block IB interceptors for delivery in fiscal year 2014.

The fiscal year 2011 budget request included plans by MDA to procure 66 SM-3 Block IB interceptors in fiscal year 2012. However, the budget request procures 20 less SM-3 Block IB interceptors than previously planned.

The SM-3 Block IB is a fundamental element of the President's phased, adaptive approach (PAA) to missile defense in Europe and in other geographic regions. In particular, sufficient inventories of SM-3 Block IB interceptors are necessary by 2015 to meet the President's planned deployment of phase 2 of the European PAA, to include a planned inventory of 36 Aegis BMD ships and an Aegis Ashore site in Romania. However, as noted in the February 2010 Ballistic Missile Defense Review "demand for U.S. BMD assets is likely to exceed supply for some years to come."

The committee is concerned that the current procurement plan for SM-3 interceptors is insufficient to meet the deployment plans of the PAA. At the same time, the committee seeks to ensure the SM-3 Block IB interceptor is sufficiently tested prior to MDA's planned ramp-up in interceptor production.

MDA has delayed the first SM-3 Block IB flight test until August 2011 to allow the Aegis BMD program office to resolve ongoing technical issues with the divert and attitude control system in the interceptor kill vehicle. In March 2010, the Government Accountability Office (GAO) reported that the "Aegis BMD program is putting the SM-3 Block IB at risk for cost growth and schedule delays by planning to begin manufacturing in 2010 before its critical technologies have been demonstrated in a realistic environment." In March 2011, GAO reported that MDA agreed to delay the start of SM-3 Block IB manufacturing until the Block IB had been successfully flight tested, consistent with its recommendations.

The committee expects that MDA will only allocate additional funding for SM-3 Block IB production in fiscal year 2012 if the first flight test is successful. Should the planned SM-3 Block IB flight testing be further delayed or technical issues remain unresolved, the committee would consider a reallocation of these funds to procure additional SM-3 Block IA interceptors.

The committee recommends \$615.4 million, an increase of \$50.0 million, for Aegis ballistic missile defense to procure additional SM-3 Block IB interceptors.

### *Terminal High Altitude Area Defense*

The budget request contained \$833.2 million for procurement of Terminal High Altitude Area Defense (THAAD) procurement for the Missile Defense Agency (MDA).

The budget request would support the procurement of 68 interceptors, a fifth THAAD battery consisting of 6 launchers, and one Tactical Station Group. The fiscal year 2011 budget request of \$858.9 million included plans by MDA to procure 67 THAAD interceptors, a fourth THAAD battery consisting of 6 launchers, and additional launchers for batteries 1-3. However, technical issues associated with a safety component in the interceptor resulted in a production stop and delayed contract award. As a result, the Department of Defense and Full-Year Continuing Appropriations Act, 2011 (Public Law 112-10) decreased THAAD procurement by \$272.0 million, and only 22 of the planned 67 interceptors were

procured. Additionally, MDA expects to procure fewer launchers in fiscal year 2011 than initially planned.

The THAAD missile defense system is a fundamental element of the President's phased, adaptive approach (PAA) to missile defense in Europe and a regional missile defense capability required by several combatant commanders. However, as noted in the February 2010 Ballistic Missile Defense Review, "demand for U.S. BMD assets is likely to exceed supply for some years to come." According to MDA, the Army has requested that each THAAD battery comprise 6 launchers per battery rather than the currently funded configuration of three launchers per battery. Additionally, the total procurement objective of 503 THAAD interceptors, which is consistent with the recommendations from the 2007 Joint Capability Mix-II study, has been deferred beyond the Future Years Defense Program.

The committee is concerned that the reduction in THAAD launcher and interceptor procurement funds in fiscal year 2011 will create a ripple effect in future years of fewer quantity procurements and delayed deliveries. MDA plans to ramp-up THAAD interceptor production from 22 in fiscal year 2011, to 68 in fiscal year 2012, to near 68 interceptors per year in fiscal years 2013–2016. However, the committee understands that this increase is limited by a current manufacturing capacity of four interceptors per month. A manufacturing capacity of six interceptors per month would support MDA's planned production increase, but would require additional tooling and test equipment.

The committee recommends \$883.2 million, an increase of \$50.0 million, for Terminal High Altitude Area Defense procurement to procure additional launchers and tooling and test equipment to support the Missile Defense Agency's planned ramp-up in interceptor production.

#### *Transition of non-lethal weapons*

In the committee report (H. Rept. 111–491) accompanying the Ike Skelton National Defense Authorization Act for Fiscal Year 2011, the committee noted the increasing importance of non-lethal weapons (NLW) use in reducing non-combatant casualties and in meeting escalation of force requirements. Additionally, the Department has affirmed the need for NLW and the useful contributions NLW make to meeting military objectives across the operational spectrum.

Despite the Department's statements supporting the development and employment of NLWs, the committee remains concerned that the Department has not taken adequate steps to transition NLW research and development efforts of the Joint Non-Lethal Weapons Program and the individual service NLW programs to specific procurement lines within the services. The committee believes the inadequate linkage between the development of NLW capabilities and the procurement and subsequent fielding of NLWs negatively impacts warfighter training with and use of NLWs.

Elsewhere in this report, the committee directs the Secretaries of the military departments to clearly identify a procurement account for NLW line items in their future year budget submissions. The committee's oversight of the Department's NLW investments is limited due to the lack of clear data on NLW budgets and pro-

grams, as programs are often grouped in multiple categories and are often contained in multiple service line items.

The committee encourages the Department to continue its efforts to improve the development and fielding of NLWs, and to address the concerns raised in the April 2009 Government Accountability Office report 09-344 titled, “DOD Needs to Improve Program Management, Policy, and Testing to Enhance Ability to Field Operationally Useful Non-Lethal Weapons.”

## LEGISLATIVE PROVISIONS

### SUBTITLE A—AUTHORIZATION OF APPROPRIATIONS

#### Section 101—Authorization of Appropriations

This section would authorize appropriations for Procurement at the levels identified in section 4101 of division D of this Act.

### SUBTITLE B—ARMY PROGRAMS

#### Section 111—Limitation on Retirement of C-23 Aircraft

This section would limit the Secretary of the Army from retiring C-23 aircraft until 1 year after the Director of the National Guard, in consultation with the Chief of Staff of the Army, the Chief of Staff of the Air Force, Commander, U.S. Northern Command, Commander, U.S. Pacific Command, and the Administrator of the Federal Emergency Management Agency submits an intra-theater airlift study to the congressional defense committees that incorporates a comprehensive review of intra-theater airlift requirements for both title 10, United States Code, and title 32, United States Code, operations. This section would also require the Comptroller General of the United States to review the report.

#### Section 112—Limitation on Procurement of Stryker Combat Vehicles

This section would limit the procurement of Stryker Combat Vehicles to not more than 100 vehicles unless the Secretary of the Army submits a waiver.

#### Section 113—Multiyear Procurement Authority for Airframes for Army UH-60M/HH-60M Helicopters and Navy MH-60R/MH-60S Helicopters

This section would authorize the Secretary of the Army to enter a multiyear procurement contract in accordance with section 2306b of title 10, United States Code, for up to 5 years for UH-60M/HH-60M helicopter airframes and, acting as the executive agent for the Department of the Navy, for MH-60R/S airframes.

### SUBTITLE C—NAVY PROGRAMS

#### Section 121—Multiyear Funding for Detail Design and Construction of LHA Replacement Ship Designated LHA-7

This section would amend section 111 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383) by adding a third year of multiyear authority to fully

fund the LHA-7. Instead of just fiscal years 2011-12, this section would authorize the Secretary of the Navy to also fund the ship in fiscal year 2013.

#### Section 122—Multiyear Funding for Procurement of Arleigh Burke-Class Destroyers

This section would authorize the Secretary of the Navy to enter into a multiyear procurement of *Arleigh Burke*-class destroyers beginning with the fiscal year 2012 program year. The Secretary is required to submit a report to the congressional defense committees, 30 days prior to contract award, containing the findings required by subsection (a) of section 2306b of title 10, United States Code.

#### Section 123—Multiyear Procurement Authority for Mission Avionics and Common Cockpits for Navy MH-60R/S Helicopters

This section would authorize the Secretary of the Navy to enter into one or more multiyear procurement contracts in accordance with section 2306b of title 10, United States Code, for up to 5 years for MH-60R/S mission avionics and common cockpits.

#### Section 124—Separate Procurement Line Item for Certain Littoral Combat Ship Mission Modules

This section would direct the Secretary of Defense to provide a separate, dedicated procurement line for each of the primary three mission modules for the Littoral Combat Ship (LCS) commencing with the budget request for fiscal year 2013. Currently, LCS mission modules are in one procurement line in Other Procurement, Navy. The three primary mission modules are for Surface Warfare, Mine Countermeasures, and Anti-Submarine Warfare. Three distinct lines would allow the committee to have visibility into the quantity of each type of module and the cost of each type of module that is being requested each year. This section also would require that any classified mission modules or components of the modules be included in the classified annex to the budget request.

#### Section 125—Life-Cycle Cost-Benefit Analysis on Alternative Maintenance and Sustainability Plans for the Littoral Combat Ship Program

This section would direct the Secretary of the Navy to conduct a life-cycle cost-benefit analysis comparing alternative maintenance and sustainability plans for the Littoral Combat Ship program in accordance with the Office of Management and Budget Circular A-94, to be delivered to the congressional defense committees with the President's budget submission for fiscal year 2013.

With the commissioning of the USS *Freedom* and USS *Independence*, the Navy is now in a position to develop a maintenance and sustainability concept for these ships, which will eventually comprise a large percentage of the fleet.

## Section 126—Limitation on Availability of Funds for F/A–18 Service Life Extension Program

This section would prohibit the obligation or expenditure of funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2012 or any fiscal year thereafter for a program to extend the life of F/A–18 aircraft beyond 8,600 hours until a date that is 30 days after the date on which the Secretary of the Navy submits to the congressional defense committees the report under section 114(a)(2) of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111–383).

### SUBTITLE D—AIR FORCE PROGRAMS

#### Section 131—B–1 Bomber Force Structure

This section would allow the Secretary of the Air Force to retire 6 B–1 bomber aircraft, but would require the Secretary to maintain a combat-coded inventory of 36 B–1 bomber aircraft and requisite number of training and testing aircraft to support 36 combat-coded aircraft.

#### Section 132—Procurement of Advanced Extremely High Frequency Satellites

This section would authorize the Secretary of the Air Force to enter into a fixed price contract to procure two Advanced Extremely High Frequency (AEHF) satellites, authorize incremental funding of the two AEHF satellites over a period not to exceed five years, and establish a limitation on the total funds to be obligated and expended for the procurement. This section would also require the Secretary of the Air Force to submit a report to the congressional defense committees on contract details, cost savings, and plans for reinvesting the cost savings into capability improvements for future blocks of AEHF satellites.

The Air Force proposes to procure two AEHF satellites over seven years using advanced appropriations authority as part of its new Evolutionary Acquisition for Space Efficiency (EASE) approach to space acquisition. The Air Force believes a block buy of two satellites can drive down costs, improve stability in the space industrial base, and allow for investments in technology that will lower risk for future programs. However, such an approach, if fully funded in a single fiscal year, would consume a large portion of the overall space budget and negatively impact other mission-critical programs.

While the committee supports the objectives of EASE, it has reservations about its implementation. The committee does not support the request for advanced appropriations authority and notes that such authority has not been provided to the Department in the past and would limit the oversight ability of future Congresses. The committee is aware of Air Force plans to begin advanced procurement of additional AEHF satellites starting in fiscal year 2016, and the committee believes incremental funding for one block of satellites should be completed before procurement of additional satellites. Therefore, the committee recommends incremental funding authority over a period not to exceed five years for the procurement of the two AEHF satellites.

The committee expects the Air Force to realize substantial savings from the EASE block buy approach, enabled by a fixed-price contract and fixed requirements. The committee also expects the Air Force to reinvest any savings into a capability insertion program, which is addressed in another section of the report, where research and development activities are competitively awarded and new technologies are matured for insertion into future blocks of AEHF satellites or other military communications satellites. Further, the committee believes that the EASE approach must be viewed as a longer-term strategy for space acquisition to fully realize the benefits of the capability insertion program and to provide longer-term stability in the industrial base.

The committee understands that the Air Force intends to apply the EASE approach to the procurement of Space-Based Infrared satellites in the fiscal year 2013 budget request. The committee discourages the use of advanced appropriations in future budget requests.

#### SUBTITLE E—JOINT AND MULTISERVICE MATTERS

##### Section 141—Joint Improvised Explosive Device Defeat Fund

This section would require the Director, Joint Improvised Explosive Device Defeat Organization to continue to provide a report to the congressional defense committees on the Joint Improvised Explosive Device Defeat Fund that details the monthly commitments, obligations, and expenditures by lines of operation.

##### Section 142—Contracts for Commercial Imaging Satellite Capacities

This section would repeal section 127 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111–383).

While the committee believes that commercial imagery satellites are becoming a key part of the overhead imagery architecture, it does not believe Congress should prescribe a specific minimum telescope aperture size for commercial imagery satellites that the U.S. Government does not own or operate. Rather, the committee encourages the Department of Defense to work with commercial imagery providers to communicate its capability requirements and allow the commercial providers to offer their technical proposals on how best to meet the requirements.

##### Section 143—Limitation on Availability of Funds for Acquisition of Joint Tactical Radio System

This section would limit the obligation of funds of the Joint Tactical Radio System to not more than 70 percent of the requested amount until the Secretary of the Army submits to the congressional defense committees written certification that the acquisition strategy for full rate production includes full and open competition.

##### Section 144—Limitation on Availability of Funds for Aviation Foreign Internal Defense Program

This section would require a report outlining U.S. Special Operations Non-Standard Aviation and Aviation Foreign Internal De-

fense programs and strategies. This section would also prohibit U.S. Special Operations Command from obligating more than 50 percent of the funds available for fiscal year 2012 for procurement of fixed wing non-standard aviation platforms until the required report has been submitted to the congressional defense committees.

#### Section 145—Limitation on Availability of Funds for Commercial Satellite Procurement

This section would prohibit the Defense Information Systems Agency and the Air Force from obligating more than 20 percent of the funds available for fiscal year 2012 for commercial satellite procurement until the Secretary of Defense provides an independent assessment of the acquisition strategy.

#### Section 146—Separate Procurement Line Item for Non-Lethal Weapons Funding

This section would direct the Secretary of Defense to provide a dedicated procurement line item in future defense budget submissions for non-lethal weapons (NLW). The committee expects that each line item description will identify the specific programs for which funds are being requested; provide summary justification for the program; identify whether the program is a joint or service-specific initiative; and the amount of funding provided during the past fiscal year. The committee also expects the Department to provide similar information for all budget requests for research, development, test and evaluation for NLWs.
